Financial Statements

Almeida Junior Shopping Centers S.A.

December 31, 2025
With Independent Auditor’s Report

MANAGEMENT REPORT

In compliance with legal provisions and in accordance with current Brazilian corporation law, Almeida Junior Shopping Centers S.A. ("Almeida Junior" or the "Company") presents the Management Report together with the financial statements for the year ended December 31, 2025. The individual and consolidated financial statements have been prepared in accordance with the accounting practices adopted in Brazil and with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

Operating performance

In 2025, the six malls of the Almeida Junior group recorded growth. Compared to 2024, storeowners' sales increased 10.6%.

The Company also recorded significant growth in key industry metrics.

Same area sales (SAS) and same store sales (SSS) grew 9% year on year. This result was primarily due to the management of the store mix, the attractiveness of the ventures and the performance of storeowners throughout the year.

The storeowners' total average occupancy cost in 2025 was 9.0% of sales, contributing to the economic sustainability of storeowners and the attractiveness of the ventures. As a result, Almeida Junior reached an occupancy rate of 96.9%.

All six units of the group presented good results and novelties in the mix of their operations throughout the year.

The Company has 237 thousand sqm of GLA and holds a market share of more than 70% (seventy percent) in this industry in the state of Santa Catarina.

Our current portfolio of shopping malls has an organic expansion capacity already defined that, in existing assets, could reach a total of 277 thousand sqm of GLA. Through expansions and the transformation of large areas into GLA of smaller commercial use stores with more attractive profitability, we can increase the profitability of our assets. The first mall that will be expanded, Balneário Shopping, has already approved licenses and will reach a total GLA of 52 thousand sqm.

Financial Performance

Our operating income for the year ended December 31, 2025 totaled R$328.8 million, up 9.7% compared to the year ended December 31, 2024.

In the year ended December 31, 2025, we recorded an increase of 11.1% in Adjusted NOI and 13.7% in Adjusted EBITDA compared to the year ended December 31, 2024 (normalized), totaling R$302.1 million and R$261.0 million, respectively. Refer to the voluntary disclosure of the non-accounting information NOI below:

Consolidated NOI in R$ (000)	**12/31/2025**	**12/31/2024**	**∆%**
Operating Income (i)	**328,842**	**299,768**	**9.7%**
(-) Administration fees	(19,344)	(14,094)	
(+) Operating costs	(12,673)	(15,553)	
NOI before allowance for ECL	**296,825**	**270,121**	**9.9%**
(+) Allowance for expected credit losses (ECL)	(717)	(3,314)	
NOI after allowance for ECL	**296,108**	**266,807**	**11.0%**
NOI margin	**95.7%**	**93.4%**	
(-) Adjustment - transfer of parking lot lease cost (ii)	5,975	5,016	
Adjusted NOI	**302,083**	**271,823**	**11.1%**
Adjusted NOI Margin	**97.6%**	**95.2%**	

(i) Gross revenue adjusted for discounts and cancellations;
(ii) Management adjusted the amount of funds transferred to FII AJ Malls relating to its share in income from parking lot operation, in order to appropriately reflect the Company's P&L indicators.

CVM Ruling No. 156 of June 23, 2022 provides for the voluntary disclosure of the non-accounting information called EBITDA, as follows:

	12/31/2025	12/31/2024	Δ%
Net income for the year	**307,272**	**177,463**	**73.1%**

	85.7%	**82.7%**	

*** On operating revenue, net**

Registration of publicly-held company

In November 2021, the Company was registered as a publicly-held company with the Brazilian Securities and Exchange Commission (CVM), an important milestone for Almeida Junior. “We are confident and unhurried, observing the market, analyzing opportunities and waiting for the best moment to launch our IPO,” says Jaimes Almeida Junior, CEO and founder of the Company.

Sustainability

Almeida Junior restates its ongoing commitment to initiatives featuring the best environmental, social, and governance (ESG) practices. We believe that our role, as the largest shopping mall operator in the state, is to act as an agent of transformation, especially in a context that calls for a complete shift in how we think, operate, and impact society in the state of Santa Catarina.

Environmental: Preservation, Consciousness and Green Infrastructure

As for environmental management, we maintain strict standards supported by an efficient infrastructure. Our architectural projects prioritize natural lighting and use only LED fixtures, in addition to smart automation systems and charging stations for electric vehicles. Our waste management strategy includes comprehensive recycling practices and reverse logistics, and we also provide the general public with convenient drop-off points for batteries and electronics to ensure proper disposal.

In 2025, we expanded our environmental education initiatives and strengthened direct engagement with the community. A highlight was the “*Mães de Anjo*” initiative at Neumarkt Shopping, which distributed seedlings of native tree species and collected feedback from the community on urban improvements. We also promoted volunteer efforts by employees who planted tree seedlings in public parks across the cities where we operate, reinforcing our role in helping build a more sustainable future. We also strengthened the permanent campaign to collect aluminum tabs and plastic bottle caps in our malls, turning waste into hundreds of kilos of pet food for NGOs, and cleaning supplies – combining environmental stewardship with social responsibility.

Social: Inclusion, Health, and Human Connection

The social pillar was a major highlight in 2025, broadening our focus on inclusion and well-being.
Inclusion and Neurodiversity: We strengthened our leadership in inclusive practices. In addition to dedicated parking spaces for people with autism and the availability of noise-canceling headphones and identification lanyards at our concierge desks, we inaugurated "*Sala do Aconchego*" (The Comfort Room, in English) at Norte Shopping. This sensory space was specially designed to support individuals with Autism Spectrum Disorder (ASD) during moments of sensory overload. We also continued the "*Sessão Azul*" program–adapted movie screenings with reduced sound and soft lighting–ensuring accessible leisure options for all.

Health and Well-Being: Our malls have positioned themselves as health hubs. We supported vital campaigns such as "*Outubro Rosa*", with a notable highlight being the "*Um Brinde à Vida"* (A Toast to Life) event at Nações Shopping, which combined awareness-raising with women's networking. We encouraged sports and quality of life by hosting stages of the "Run For Parkinson's", helping raise visibility for the cause. We also maintained our traditional Prenatal Courses, offering free support to families.

Solidarity and Volunteerism: Through the "*AJ em Ação*" program, our corporate volunteer initiative reached significant milestones in 2025, benefiting thousands of people through donations and volunteer hours. We strongly supported the *McDia Feliz* campaign, directing proceeds from sales to children's hospitals across the state of Santa Catarina. Animal welfare also remains a core commitment, with frequent pet adoption fairs and initiatives such as *"Pausa para o Amor"* (Pause for Love), helping connect pets with new homes.

Governance: Ethics, Transparency and Credibility

Almeida Junior's strength is grounded in high standards of corporate governance. We are aligned with B3's *Novo Mercado* segment, which represents the most rigorous level of corporate governance practices in the Brazilian market.

To ensure transparency and safeguard our investors and stakeholders, we have established a stringent Audit, Risk Management, and Compliance Committee, ensuring compliance with all internal and external regulations. Our financial statements are audited by Ernst & Young Auditores Independente S/S Ltda. (EY), one of the world's largest auditing firms (Big Four), reinforcing the integrity and responsibility with which we conduct our business and contribute to the development of Santa Catarina.

Independent auditors

Pursuant to CVM Ruling No. 381 of January 14, 2003, ratified by CVM/SNC/SEP Memorandum Circular of February 2, 2018, we represent that the policies of the Company and its subsidiaries for the engagement of services of independent auditors aim to ensure that there is no conflict of interest and loss of independence of the auditor. The Company's policy for the engagement of services of our independent auditors that are not related to external auditing is based on the principles that preserve the independence of the independent auditor. These internationally accepted principles are: (a) an auditor should not audit their own work; (b) an auditor cannot perform managerial duties for a client; and (c) an auditor must not advocate for a client.

In the year ended December 31, 2025, the Company's independent auditors, EY, in addition to performing the review of quarterly information and the audit of the Company's individual and consolidated financial statements, provided comfort letter services in connection with a debt issue process. No other audit or non-audit services were provided to the Company.

Independent auditor's report on individual and consolidated financial statements

To the Shareholders, Board of Directors and Officers of
Almeida Junior Shopping Centers S.A.
São Paulo - SP

Opinion

We have audited the individual and consolidated financial statements of Almeida Junior Shopping Centers S.A. (the "Company"), identified as Individual and Consolidated, respectively, which comprise the statement of financial position as at December 31, 2025 and the statements of income, comprehensive income, of changes in equity and of cash flows for the year then ended, and the notes to the financial statements, including material accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the individual and consolidated financial position of Almeida Junior Shopping Centers S.A. as at December 31, 2025, and its individual and consolidated financial performance and cash flows for the year then ended, in accordance with the accounting practices adopted in Brazil and with the International Financial Reporting Standards (IFRS Accounting Standards) issued by the International Accounting Standards Board (IASB).

Basis for opinion

We conducted our audit in accordance with the Brazilian and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the individual and consolidated financial statements" section of our report. We are independent of the Company and its subsidiary in accordance with the relevant ethical principles set forth in the Code of Professional Ethics for Accountants and the professional standards issued by Brazil's National Association of State Boards of Accountancy (CFC), applicable to audits of financial statements in Brazil, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matter

A key audit matter is a matter that, in our professional judgment, was of most significance in our audit of the financial statements of the current year. This matter was addressed in the context of our audit of the individual and consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter. Our description of how our audit addressed the matter below, including any commentary on the findings or outcome of our procedures, is provided in the context of the financial statements taken as a whole.

We have fulfilled the responsibilities described in the "Auditor's responsibilities for the audit of the individual and consolidated financial statements" section of our report, including in relation to this key audit matter. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatements of the financial statements. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying individual and consolidated financial statements.

Fair value measurement of investment properties

As at December 31, 2025, as mentioned in Note 8, the balance of investment properties, measured at fair value, totaled R$867,988 thousand and R$4,862,430 thousand of the total individual and consolidated assets, respectively. The methodology and modeling used by the Company to determine the fair value involved significant judgment and relied on a range of data and assumptions, which included, in addition to the current and historical performance of lease agreements, projections of future lease revenues, market conditions, and occupancy and discount rates, among others.

We consider this a key audit matter due to the significance of the amounts involved in relation to total assets, equity and to the effects of adjustments to fair value on profit or loss for the year, in addition to the uncertainties inherent in estimating fair value, given the high level of judgment in determining the significant assumptions used.

How our audit addressed this matter

Our audit procedures included, among others: (a) assessing internal controls related to the measurement of fair values of the investment properties; (b) involving experts in valuation models to assist us in analyzing assumptions and reviewing the methodology used by the executive board in the projections supporting fair value of the investment properties; (c) assessing the reasonableness and consistency of the data and assumptions used in preparing these projections, including growth rates, discount rates, and projected cash flows, among others, and comparing those with external market information, (d) verifying the accuracy of the arithmetic calculations within the projections; (e) comparing the accuracy of projections made in prior periods with the Company's actual performance during the year; (f) analyzing information that could contradict the most significant assumptions and methodologies selected; (g) analyzing sensitivity of such assumptions to assess the behavior of fair value, taking into consideration other scenarios and assumptions based on market data; (h) comparing the fair value adopted by the executive board, based on discounted cash flows, with book value of the investment properties; and (i) assessing fairness of the disclosures in the respective notes to the financial statements.

Based on the result of the audit procedures performed on the measurement of investment properties at fair value, which is consistent with the executive board's assessment, we consider that the criteria and assumptions adopted by the executive board to determine the fair value of investment properties to be acceptable in the context of the individual and consolidated financial statements taken as a whole.

Other matters

Statements of value added

The individual and consolidated statements of value added (SVA) for the year ended December 31, 2025, prepared under the responsibility of the Company's executive board, and presented as supplementary information for the purposes of IFRS, were submitted to audit procedures conducted together with the audit of the Company's financial statements. To form our opinion, we evaluated if these statements are reconciled to the individual and consolidated financial statements and accounting records, as applicable, and if their format and content comply with the criteria defined by Accounting Pronouncement CPC 09 – Statement of Value Added. In our opinion, these individual and consolidated statements of value added were prepared fairly, in all material respects, in accordance with the criteria defined in the above-mentioned accounting pronouncement, and are consistent in relation to the individual and consolidated financial statements taken as a whole.

with confidence

Other information accompanying the individual and consolidated financial statements and the auditor's report

The executive board is responsible for such other information, which comprises the Management Report.

Our opinion on the individual and consolidated financial statements does not cover the Management Report and we do not express any form of assurance conclusion thereon.

In connection with our audit of the individual and consolidated financial statements, our responsibility is to read the Management Report and, in doing so, consider whether this report is materially inconsistent with the individual and consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of the Management Report, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the executive board and those charged with governance for the individual and consolidated financial statements

The executive board is responsible for the preparation and fair presentation of the individual and consolidated financial statements in accordance with the accounting practices adopted in Brazil and with the International Financial Reporting Standards (IFRS Accounting Standards) issued by the International Accounting Standards Board (IASB), and for such internal control as the executive board determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the individual and consolidated financial statements, the executive board is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the executive board either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's and its subsidiaries' financial reporting process.

Shape the future
with confidence

Auditor's responsibilities for the audit of the individual and consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the individual and consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Brazilian and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Brazilian and International Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess risks of material misstatements of the individual and consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and its subsidiaries' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the executive board.
- Conclude on the appropriateness of the executive board's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, then we are required to draw attention in our auditors' report to the related disclosures in the individual and consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and its subsidiaries to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the individual and consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Shape the future
with confidence

We communicate with those charged with governance regarding, among other matters, the scope and timing of the planned audit procedures and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we comply with relevant ethical requirements, including those regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, the actions taken to eliminate threats, or the safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the individual and consolidated financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1. General information on the Company

a) Operations

Almeida Junior Shopping Centers S.A. (the "Company" or "Almeida Junior") is a corporation with main offices at Av. Brigadeiro Faria Lima, No. 2277, cj 1604, in the City and State of São Paulo (SP), primarily engaged in (i) economically exploring and administering shopping malls, condominiums, own or third-party assets; (ii) holding direct or indirect interest in shopping malls; (iii) providing corporate advisory and consulting services, corporate management, planning and related activities, relating to shopping malls and/or commercial ventures of a similar nature; (iv) leasing kiosks, shop windows and providing merchandising services to shopping malls and stores; (v) providing intermediation services for space lease in shopping mall stores; (vi) exploring and owning media for publicity of own or third-party products; (vii) holding interest in, managing and exploring vehicle parking lots; (viii) building and developing shopping malls; and (ix) holding interest in other business companies or non-business companies, as a partner, shareholder or member, in Brazil and/or abroad. In 2021, the Company completed its registration with the Brazilian Securities and Exchange Commission ("CVM").

The Company's and its subsidiaries' operations are subject to seasonality. Historically, festive dates and holidays, such as Christmas, and Mother's Day, among others, have had a positive impact on shopping mall sales.

2. Summary of material accounting policies

2.1 Revenue recognition

Revenues and costs substantially derive from mall exploration activities. The Company recognizes revenue in proportion to interest held. The Company and its subsidiaries recognize lease revenues and assignment of rights of use under the straight-line method over the lease term, included in revenue in the statement of profit or loss due to its operating nature. These operations are classified as operating leases, since the Company does not substantially transfer all risks and rewards inherent in ownership of the asset. Costs and expenses are recorded on an accrual basis.

The Company assesses revenue transactions in accordance with specific criteria to determine if it is the agent or principal and concluded that it has been acting as the principal in all its sales agreements. The following specific criteria should also be satisfied before revenue recognition:

2. Summary of material accounting policies (Continued)

2.1 Revenue recognition (Continued)

Lease revenues

Minimum lease amounts established, including periodical fixed increases provided for in the agreements and excluding inflation adjustments, are recognized in proportion to interest held by the Company in each venture, on a straight-line basis, over the term of the respective agreements, irrespective of the manner in which the amounts are received. Revenue from lease of kiosks and mall spaces, shop windows, media and merchandising spaces are also considered. Commercial unit lessees usually pay lease that corresponds to the higher of a minimum monthly amount, annually adjusted based mostly on the General Price Index - Internal Availability (IGP-DI) variation, and an amount obtained by applying a percentage on gross sales revenue of each lessee.

Revenue from assignment of rights of use

Revenue from assignment of rights of use (key money) is recognized on a straight-line basis, over the agreement term and the stores to which they refer, as from lease commencement, irrespective of the manner in which the amounts are received.

Revenue from parking lots

This revenue derives from interest held in and exploration of parking facilities located in shopping malls, represented by collection of amounts from customers for leaving their vehicles in the parking lot. This revenue is posted to P&L on an accrual basis.

Revenue from services provided

This revenue derives from provision of shopping mall administration services, real estate business advisory services in general, agency and advisory services of a promotion and publicity nature, for lease and/or sale of spaces for commercial use, and parking lot exploration and management. Service revenue is recognized on an accrual basis.

2. Summary of material accounting policies (Continued)

2.2 Finance income and finance costs

For all financial instruments stated at amortized cost and interest-bearing financial assets, classified as available for sale, finance income or costs are recorded using the effective interest rate, which exactly discounts estimated future cash payments or receipts over the estimated life of the financial instrument or a shorter period, as applicable, to the net book value of the financial asset or liability. Finance income is recorded on an accrual basis and represents substantially interest earned on accounts receivable settled after maturity and short-term investment yield. Finance costs represent interest effectively incurred and other charges on loans, financing, bank expenses and other financial transactions. These events are recorded as finance income (costs), in the statement of profit or loss.

2.3 Taxes

Income and social contribution taxes - current

Tax assets and liabilities of the current and prior years are measured at the amounts recoverable from or payable to tax authorities. Tax rates and tax laws used to compute these amounts are those in force or substantially in force at the statement of financial position date. Income and social contribution taxes of subsidiaries Balneário Camboriú Shopping Participações Ltda., Norte Shopping Participações S.A., Shopping Park Ltda., SCP Continente, SCP Norte, SCP Nações and SCP Joinville are calculated on taxable profit computed as a percentage of the company's gross revenue (*"lucro presumido"*). For the other subsidiaries, income and social contribution taxes are calculated on annual taxable profit computed based on the company's accounting records (*"lucro real"*). Provision for income tax was set up at 15% plus surtax of 10% on annual taxable profit exceeding R$240, whereas social contribution tax was computed at 9% on adjusted book profit. Income and social contribution taxes were recorded on an accrual basis.

2. Summary of material accounting policies (Continued)

2.3. Taxes (Continued)

Deferred taxes

Deferred tax assets are recognized on all deductible temporary differences and unused tax credits and losses to the extent that taxable profit is likely to be available so that deductible temporary differences can be realized and tax credits and losses can be used. Deferred tax liabilities are recorded on temporary tax differences relating to re-measurement of assets and fair value of the ventures.

Book value of deferred tax assets is reviewed at each statement of financial position date and written off to the extent that taxable profit is no longer likely to allow deferred tax assets to be fully or partially used.

Deferred tax assets and liabilities are measured at the tax rate expected to be applied in the year in which the asset or the liability will be realized or settled, based on the tax rates (and tax laws) in force at the statement of financial position date.

Deferred tax assets and liabilities are presented net when there is a legal or constructive right to offset tax assets against tax liabilities and deferred taxes relate to the same tax-paying entity and are subject to the same tax authority.

Sales taxes

Revenue, expenses and assets are recognized net of sales taxes, except:

- When the sales taxes incurred on the purchase of goods or services are not recoverable from tax authorities, in which case the sales tax is recognized as part of the cost of acquisition of the asset or expense item, as applicable; and
- When the amounts receivable and payable are presented together with the amount of sales taxes.
- The net value of sales taxes, recoverable or payable, is included as part of receivables or payables in the statement of financial position.

2. Summary of material accounting policies (Continued)

2,3. Taxes (Continued)

Sales taxes (Continued)

Revenues from sales and services are subject to the following taxes and contributions, at the following rates:

- Contribution Tax on Gross Revenue for Social Integration Program (PIS): At 0.65% (cumulative regime) and 1.65% (non-cumulative regime);
- Contribution Tax on Gross Revenue for Social Security Financing (COFINS): At 3% (cumulative regime) and 7.60% (non-cumulative regime);
- Service Tax (ISS): 2.5% to 5%.

2.4 Financial instruments

a) Financial assets

Major financial assets recorded by the Company include cash and cash equivalents, restricted cash, short-term investments, trade accounts receivable, accounts receivable from related parties and other assets. Classification of these instruments is described in Note 24.

Financial instruments are only recognized as of the date on which the Company becomes a party to the contractual provisions of such instruments. When recognized, financial instruments are initially recorded at fair value plus transaction costs directly attributable to their acquisition or issue, except for financial assets and liabilities classified at fair value through profit or loss, whose costs are recorded directly in P&L for the year. Subsequent measurement occurs at each statement of financial position date, pursuant to the rules established for each type of financial assets or liabilities, as follows:

i) *Measured at fair value through profit or loss*

These are financial assets held for trading, when acquired for this purpose, especially in the short term. Derivative financial instruments are also classified under this category. Assets under this category are classified in current assets.

2. Summary of material accounting policies (Continued)

2.4. Financial instruments (Continued)

a) Financial assets (Continued)

i) *Measured at fair value through profit or loss* (Continued)

These comprise investments in certain financial assets classified upon inception as held to maturity, which are measured at acquisition cost plus income earned according to contractual terms and conditions.

ii) *Measured at amortized cost*

This classification includes non-derivative financial assets, with payments that are fixed or determinable, which cannot be quoted in an active market. They are classified in current assets, except, where applicable, those maturing over 12 months as of the statement of financial position date, which are classified as noncurrent assets.

When applicable, this classification includes non-derivative financial assets designated as available for sale or those not classified as: (i) loans and receivables; (ii) investments held to maturity; or (iii) financial assets at fair value through profit or loss.

A financial asset (or, where appropriate, a portion of a financial asset or a portion of a group of similar financial assets) is written off and excluded from P&L for the year when: (a) the rights to receive cash flows from the asset have expired; or b) the Company has transferred its rights to receive cash flows from the asset or assumed an obligation to fully pay the cash flows received to a third party. In this case, the Company also observes whether it has transferred substantially all risks and rewards relating to the asset or has transferred control over the asset.

b) Financial liabilities

Major financial liabilities recognized by the Company include trade accounts payable, debentures and loans, lease payment obligations, and other accounts payable. Classification of these instruments is described in Note 24.

2. Summary of material accounting policies (Continued)

2.4. Financial instruments (Continued)

b) Financial liabilities (Continued)

Upon initial recognition, Company financial liabilities are classified as trade accounts payable, debentures and loans, and other accounts payable. Financial liabilities are initially recognized at fair value and, in the case of debentures, loans, and other accounts payable, they are increased by transaction cost directly attributable thereto. After initial recognition, interest-bearing loans and debentures are subsequently measured at amortized cost using the effective interest rate method.

Derecognition (write-off)

A financial liability is written off when the obligation is revoked, canceled or expires. When an existing financial liability is replaced by another from the same lender under substantially different terms, or terms of an existing liability are substantially modified, such replacement or modification is treated as write-off of the original liability and recognition of a new liability, and the difference in the corresponding carrying amounts is recognized in the statement of financial position.

Financial instruments - net presentation

Financial assets and liabilities are presented net in the statement of financial position when, and only when, the entity currently has a legally enforceable right to offset the amounts recognized and intends to settle on a net basis, or to realize the asset and settle the liability simultaneously.

2.5 Present value adjustment of assets and liabilities

Noncurrent monetary assets and liabilities are monetarily restated and, therefore, adjusted to their present value. Present value adjustment of current assets and liabilities is calculated and recognized whenever the effects are considered significant on the financial statements taken as a whole. For reporting and significance determination purposes, present value adjustment is calculated considering contractual cash flows and the explicit, and sometimes implicit, interest rates of the corresponding assets and liabilities. Based on the analyses made and on management's best estimate, the Company concluded that the present value adjustment of monetary assets and liabilities is not material in relation to the financial statements taken as a whole.

2. Summary of material accounting policies (Continued)

2.6 Investment properties

Investment properties are represented by land and buildings in shopping malls maintained to earn lease revenue, for capital valuation, or both, rather than for sale in the ordinary course of business, provision of services or administrative purposes. The Company and its subsidiaries record shopping mall operations as investment properties, since these commercial ventures are maintained for operating lease purposes. Investment properties are initially measured at cost, including transaction costs.

After initial recognition, investment properties are presented at fair value, and gains and losses arising from changes in fair value of investment properties are recognized in the statement of profit or loss in the year in which such gains or losses are generated.

The fair value of investment properties does not reflect future investments of fixed capital that will increase the value of these properties or future benefits relating to these future expenditures.

The fair value of investment properties is established using the discounted cash flow method applied to the rates practiced in the market, which take into consideration market assumptions and historical profitability of each property.

On a quarterly basis, the Company monitors events that could indicate that fair value estimates must be reviewed, such as launch of greenfield projects, expansion of ventures or significant variations in shopping malls' performance as compared with budgets, and changes in the macroeconomic scenario, among others. In case such events are not identified, the Company annually reevaluates its investment properties so that their fair value reflects market conditions as of the statement of financial position date, and recognizes any changes in gains and losses in P&L for each year.

2.7 Investments in subsidiaries

Investments in subsidiaries in the individual financial statements are recorded under the equity method. A subsidiary is an entity over which the Company holds controlling interest. Controlling interest is the power to make decisions on the operational policies of the investee, among others.

2. Summary of material accounting policies (Continued)

2.7. Investments in subsidiaries (Continued)

Based on the equity method, investments in subsidiaries are recorded at cost in the statement of financial position, plus changes after acquisition of ownership interest in these subsidiaries. The statement of profit or loss reflects the portion of income from the subsidiaries' operations. When a change is directly recognized in equity of the subsidiaries, the Company recognizes its portion in this change and discloses such fact, when applicable, in the statement of changes in equity.

Interest in net income of the subsidiaries is stated as equity pickup in the statement of profit or loss, representing the portion of net profit attributable to shareholders of the subsidiaries. The financial statements of the subsidiaries are prepared for the same reporting period as the Company and the accounting policies are consistent with those adopted by the Company.

After applying the equity method, the Company determines whether additional impairment losses on its investment in the subsidiary should be recognized. The Company establishes, at each statement of financial position date, whether there is objective evidence that the investment in the subsidiary is impaired. If this is the case, the Company calculates the impairment loss and recognizes this amount in the statement of profit or loss.

2.8 Property and equipment

Property and equipment items are stated at acquisition cost. These are recorded at formation or buildup cost, net of accumulated depreciation and/or accumulated impairment, where applicable. The referred to cost includes replacement cost and borrowing costs related to long-term construction projects, when recognition criteria are met. When significant parts of property and equipment are replaced, the Company recognizes these parts as an individual asset item, with a specific useful life and depreciation. Likewise, significant repair and maintenance costs incurred are recorded in the carrying amount of the property and equipment items only if the economic benefits associated with these items are likely to be generated, the amounts can be reliably measured, and the recognition criteria are met. All other repair and maintenance costs are posted directly to P&L, when incurred.

Depreciation is calculated under the straight-line method at rates that take into consideration the estimated useful life of the assets, as follows:

2. Summary of material accounting policies (Continued)

2.8 Property and equipment (Continued)

Machinery and equipment	10 years
Vehicles	5 years
Furniture, fixtures and facilities	10 years

Property and equipment items are written off when sold or when no future economic benefits are likely to flow to the Company from their use or sale. Gains or losses, if any, arising therefrom (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) are included in the statement of profit or loss for the year in which the asset is derecognized.

2.9 Borrowing costs

Interest costs, financial charges and other costs referring to loans and financing obtained and directly related to acquisition, buildup or construction of an asset that requires significant time to be ready for its intended use or sale are capitalized as part of the cost of the corresponding asset, until the moment when these assets begin operating. All other borrowing costs are expensed in the year in which they incur.

2.10 Impairment of nonfinancial assets

Management annually reviews the net book value of assets for the purpose of assessing events or changes in economic, operating or technological circumstances that could indicate impairment or loss of their recoverable amount. When such evidence is identified and net book value exceeds the recoverable amount, a provision for impairment is recorded, to adjust the net book value to the recoverable amount. Recoverable amount of an asset item or of a cash-generating unit is defined as the higher of value in use and fair value less costs to sell.

2. Summary of material accounting policies (Continued)

2.10. Impairment of nonfinancial assets (Continued)

In assessing the value in use of an asset, estimated future cash flows are discounted to present value using a pre-tax discount rate that reflects the weighted average cost of capital (WACC) for the industry in which the cash-generating unit operates. The net sale price is determined, whenever possible, considering firm sale contracts on an arm's length basis, between knowledgeable, willing parties, adjusted by costs to sell the asset, or, in the absence of firm sale contracts, based on the observable market price in an active market, or on the most recent transaction price involving similar assets.

As at the statement of financial position dates, no factors were identified that required set-up of provision for impairment of assets, except the provision amounts already recorded.

2.11 Cash and cash equivalents

Cash and cash equivalents are held to meet short-term cash commitments, rather than for investment or other purposes. The Company considers cash equivalents short-term investments readily convertible into a known cash amount subject to a low risk of change in value. As such, investments are usually classified as cash equivalents when redeemable in the short term, that is, within three months from the inception date. Short-term investments included in cash equivalents are measured at fair value and their effects are recorded in P&L.

2.12 Restricted cash

Restricted cash consisted of retained amounts measured at fair value through profit or loss, used as guarantees pegged to financial instruments and financing, which would be used for settling loan installments.

2. Summary of material accounting policies (Continued)

2.13 Provisions

Provisions are recognized when the Company has a present (legal or constructive) obligation arising from past events, the settlement of which is expected to result in an outflow of funds and a reliable estimate of the amount can be made. Assessment of the likelihood of loss includes an evaluation of available evidence, the hierarchy of laws, available case law, recent court decisions and their relevance in the legal system, as well as the opinion of external legal advisors. The provision is reviewed and adjusted considering changes in circumstances, such as applicable statute of limitations, tax audit conclusions or additional exposures identified based on new matters or court decisions.

When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain.

The expense relating to any provision for probable contingencies is presented in the statement of profit or loss, net of any reimbursement.

Contingent liabilities whose likelihood of unfavorable outcome is assessed as possible are only disclosed in the notes to financial statements, whereas those assessed as remote require neither a provision nor disclosure.

2.14 Statement of value added

This statement is aimed at evidencing the wealth created by the Company, how it is distributed over a certain period and presented by the Company, as required by the Brazilian Corporation Law, as part of the individual financial statements and as supplementary information to the consolidated financial statements, since such statement is not provided for or mandatory under IFRS.

The statement of value added (SVA) was prepared based on information obtained from accounting records, used as basis of preparation of the financial statements, and pursuant to the provisions set out in CPC 09 - Statement of Value Added.

2. Summary of material accounting policies (Continued)

2.14. Statement of value added (Continued)

In its first part, the SVA presents the wealth created by the Company, represented by revenues (gross revenue from sales, including taxes levied thereon, other revenues and the effects of allowance for expected credit loss), inputs acquired from third parties (cost of sales and acquisitions of materials, electric power and third-party services, including taxes levied upon acquisition, the effects of losses and recovery of asset values, and depreciation and amortization) and the value added received from third parties (equity pickup, finance income and other revenues). The second part of the SVA presents distribution of wealth between personnel, taxes, charges and contributions, debt remuneration and equity remuneration.

2.15 Capital

Common shares are classified in equity. Additional costs directly attributable to the issue of shares are recognized as a deduction from equity, net of any tax effects.

Capital shares purchased by the Company (treasury shares) are recorded at the amount paid, including any additional costs directly attributable (net of income tax) and as a reduction of equity attributable to Company shareholders until these shares are canceled or reissued. When these shares are subsequently reissued, any amount received, net of any additional transaction costs, directly attributable and of the respective income and social contribution tax effects, is included in equity attributable to Company shareholders.

2. Summary of material accounting policies (Continued)

2.16 Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the issue date of the Company's financial statements are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

IFRS 18: Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, which replaces IAS 1 (equivalent to CPC 26 (R1) - Presentation of Financial Statements. IFRS 18 introduced new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Additionally, entities are required to classify all items of income and expenses within the statement of profit or loss for the year into one of the five categories of operating, investing, financing, income taxes and discontinued operations. The first three categories are new.

The standard also requires the disclosures of management-defined performance measures, subtotals of income and expenses, and includes new requirements for the aggregation and disaggregation of financial information based on the identified "roles" of the primary financial statements and the notes.

In addition, narrow-scope amendments were made to IAS 7 (equivalent to CPC 03 (R2) - Statement of Cash Flows), which include changing the starting point for determining cash flows from operating activities using the indirect method from "profit or loss for the period" to "operating profit or loss," and removing the option for classifying cash flows from dividends and interest. Moreover, there are consequential amendments in several other standards.

IFRS 18 and the amendments to other standards will come into effect for reporting periods beginning on or after January 1, 2027, with early application permitted and required to be disclosed, although early adoption is not permitted in Brazil. IFRS 18 will be applied retrospectively.

The Company is currently working to identify all the impacts that the amendments will have on the primary financial statements and the notes to the financial statements. The material impacts initially expected on the Company's financial statements are as follows:

2. Summary of material accounting policies (Continued)

2.17 Standards issued but not yet effective

- Lease revenue, changes in the fair value of investment properties, and equity in the P&L of associates and joint ventures will be classified within the investment category in the statement of profit or loss.
- Foreign exchange differences will be classified within the statement of profit or loss category (finance income/costs), in which the underlying transactions that generated such exchange differences are presented.
- New disclosures will be required, including: (a) management-defined performance measures (MPMs); (b) specific expenses by nature, should expenses be presented by function within the operating category in the statement of profit or loss; and (c) a reconciliation, for each line item in the statement of profit or loss, between the restated amounts under IFRS 18 and the amounts previously presented under IAS 1 (CPC 26 (R1)).
- Interest received and interest paid will be classified, respectively, as investing activities and financing activities in the statement of cash flows, in accordance with CPC 03 (R2) – Statement of Cash Flows.

In Brazil, CPC 26 will be replaced by CPC 51 – Presentation and Disclosure in Financial Statements (equivalent to IFRS 18). Currently, CPC and its associated entities are still discussing any conflicts CPC 51 might have with current corporate legislation. Although discussions have not ended yet, material changes to the current legislation are not expected.

<u>IFRS 19: Subsidiaries without Public Accountability: Disclosures</u>

In May 2024, the IASB issued IFRS 19, which allows eligible entities to elect to apply its reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRS accounting standards. To be eligible, at the end of the reporting period, an entity must be a subsidiary as defined in IFRS 10 (CPC 36 (R3) – Consolidated Financial Statements), cannot have public accountability and must have a parent (ultimate or intermediate) that prepares consolidated financial statements, available for public use, which comply with IFRS accounting standards.

IFRS 19 will become effective for reporting periods beginning on or after January 1, 2027, with early application permitted.

As the Company's equity instruments are publicly traded, it is not eligible to apply IFRS 9.

2. Summary of material accounting policies (Continued)

2.17. Standards issued but not yet effective (Continued)

Amendments to IFRS 9 and to IFRS 7 - Amendments to the Classification and Measurement of Financial Instruments

In May 2024, the International Accounting Standards Board (IASB) issued amendments to IFRS 9 and IFRS 7 – Amendments to the Classification and Measurement of Financial Instruments, which introduce material modifications to the classification, measurement and disclosure requirements of financial instruments. In convergence with those amendments, the Brazilian Financial Accounting Standards Board (CPC) should incorporate the changes through future revisions of CPC 48 - Financial Instruments and CPC 40 (R1) - Financial Instruments: Disclosure.

The most significant changes are:

- A clarification that a financial liability is derecognized on the “settlement date” and the introduction of an accounting policy choice (if specific conditions are met) to derecognize financial liabilities settled using an electronic payment system before the settlement date.
- Additional guidance on how the contractual cash flows for financial assets with environmental, social and corporate governance (ESG) and similar features should be assessed.
- Clarifications on what constitute “non-recourse features” and what the characteristics of contractually linked instruments are.
- The introduction of new disclosures for financial instruments with contingent features and additional disclosure requirements for equity instruments classified at fair value through other comprehensive income (OCI).

The amendments are effective for annual periods starting on or after January 1, 2026, with early adoption permitted for classification of financial assets and related disclosures only.

The Company does not anticipate that these amendments will have a material effect on its consolidated financial statements, but it will keep monitoring the convergence of pronouncements CPC 48 and CPC 40 (R1) and will assess whether its accounting policies need to be updated when the revisions are formally issued by the CPC.

2. Summary of material accounting policies (Continued)

2,17. Standards issued but not yet effective (Continued)

Annual Improvements to IFRS Accounting Standards - Volume 11

In July 2024, the IASB issued nine narrow scope amendments as part of its periodic maintenance of IFRS accounting standards. The amendments include clarifications, simplifications, corrections or changes to improve consistency in the following standards: IFRS 1 - First-Time Adoption of International Financial Reporting Standards (equivalent to CPC 37 (R1) - First-Time Adoption of International Financial Reporting Standards); IFRS 7 - Financial instruments: Disclosure (equivalent to CPC 40 (R1) - Financial instruments: Disclosure) and its Accompanying Guidance on Implementing IFRS 7; IFRS 9 - Financial Instruments (equivalent to CPC 48 - Financial Instruments); IFRS 10 - Consolidated Financial Statements (equivalent to CPC 36 (R3) - Consolidated Financial Statements); and IAS 7 - Statements of Cash Flows (equivalent to CPC 03 (R2) - Statements of Cash Flows).

In convergence with those amendments, the Brazilian Financial Accounting Standards Board (CPC) should incorporate the changes through future revisions of the corresponding accounting pronouncements.

The amendments will be effective for reporting periods beginning on or after January 1, 2026. Earlier application is permitted and must be disclosed. The amendments are not expected to have a material effect on the Company's financial statements.

Amendments to IFRS 9 and IFRS 7 - Contracts Referencing Nature-dependent Electricity

In December 2024, the IASB issued Amendments to IFRS 7 - Contracts Referencing Nature-dependent Electricity. The amendments apply only to contracts that reference nature-dependent electricity and:

- Clarify the application of the 'own-use' requirements for in-scope contracts.
- Amend the designation requirements for a hedged item in a cash flow hedging relationship for in-scope contracts.
- Add new disclosure requirements to enable investors to understand the effect of these contracts on an entity's financial performance and cash flows.

2. Summary of material accounting policies (Continued)

2.17. Standards issued but not yet effective (Continued)

These amendments are effective for annual periods beginning on or after January 1, 2026. Early adoption is permitted, but it must be disclosed. The amendments concerning the own-use exception are to be applied retrospectively, while the hedge accounting amendments must be applied prospectively to new hedging relationships designated from the initial application date. Additionally, the IFRS 7 disclosure amendments must be implemented with the IFRS 9 amendments. If an entity does not restate comparative financial statements, it cannot present comparative disclosures.

In convergence with the international standards, the Brazilian Financial Accounting Standards Board (CPC) should incorporate these changes through future revisions of CPC 48 - Financial Instruments and CPC 40 (R1) - Financial Instruments: Disclosure.
The Company does not expect that these amendments will have a material effect on its financial statements, but it will keep monitoring the convergence of pronouncements CPC 48 and CPC 40 (R1) and will assess whether its accounting policies need to be updated when the revisions are formally issued by the CPC.

2.18 New or revised pronouncements applied for the first time in 2025

The following standards applied for the first time in 2025 had no significant impact on the preparation of the Company's financial statements.

<u>Amendments to CPC 02 (R2) - Effects of Changes in Foreign Exchange Rates and Translation of Financial Statements and CPC 37 (R1) - First-Time Adoption of International Financial Reporting Standards</u>

For annual reporting periods beginning on or after January 1, 2025, the Brazilian Financial Accounting Standards Board (CPC) issued the Review of Accounting Pronouncement CPC 27, which includes amendments provided by the Lack of Exchangeability issued by the IASB, with changes in Accounting Pronouncement CPC 02 - Effects of Changes in Foreign Exchange Rates and Translation of Financial Statements and in CPC 37 (R1) - First-Time Adoption of International Financial Reporting Standards.

This change specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. These amendments also require disclosure of information that enables users of the financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

2. Summary of material accounting policies (Continued)

3.18. New or revised pronouncements applied for the first time in 2025 (Continued)

Amendments to CPC 18 (R3) - Investments in Associates, Subsidiaries, and Joint Ventures, and ICPC 09 - Individual Financial Statements, Separate Financial Statements, Consolidated Financial Statements and Application of the Equity Method

In September 2024, the Brazilian Financial Accounting Standards Board (CPC) issued amendments to Accounting Pronouncement CPC 18 (R3) and Accounting Interpretation ICPC 09 (R3), with the aim of aligning the Brazilian accounting standards with the international standards issued by the IASB.

The update to CPC 18 includes the application of the equity method (EM) for measuring investments in subsidiaries in the Individual Financial Statements, reflecting the change in international standards that now permit this practice in Separate Financial Statements. This convergence harmonizes the accounting practices adopted in Brazil with international standards, without causing material impacts in relation to the standard currently in effect, focusing solely on wording adjustments and the update of standard references.

The amendments are effective for reporting periods beginning on or after January 1, 2025. The amendments had no impact on the Company's financial statements.

2.19. Tax reform

Management evaluated the potential impacts of the Brazilian Tax Reform, enacted by Constitutional Amendment No. 132/2023 and regulated by Supplementary Laws Nos. 214/2025 and 227/2026, on financial statements for annual reporting periods beginning or after December 31, 2025, considering both direct and indirect effects. Given the current stage of regulations and the transition timeline for the Goods and Services Contribution Tax (CBS), the Goods and Services Tax (IBS), and the Excise Tax (IS), the Company assessed the possible implications for relevant accounting estimates, including asset impairment testing, fair value measurements, realization of tax credits, recognition of deferred taxes, and evaluation of going concern assumptions. To date, based on the information available and the assumptions adopted, no material impacts have been identified that would require adjustments to the financial statements. The executive board continues to closely monitor regulatory developments and the economic effects arising from the implementation of the new tax regime.

3. Basis of preparation and presentation of financial statements

On March 16, 2026, the Company management authorized the issue of the individual and consolidated financial statements for the year ended December 31, 2025.

3.1 Basis of preparation and presentation

The individual and consolidated financial statements were prepared in accordance with the accounting practices adopted in Brazil, which comprise the Brazilian Corporation Law, the Pronouncements, Interpretations and Guidance issued by the Brazilian Financial Accounting Standards Board (CPC), the rules set forth by the Brazilian Securities and Exchange Commission (CVM), and in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB), and disclose all significant information of the financial statements themselves, and only such information, which is consistent with the information used by the Company management.

The Company's individual financial statements are disclosed together with the consolidated financial statements. In the individual financial statements, the subsidiaries and joint ventures, whether a legal entity or not, are accounted for under the equity method adjusted in proportion to the interest held in the contractual rights and obligations of the Company. The same adjustments are made to both individual and consolidated financial statements to reach the same P&L and equity attributable to shareholders of the parent company. However, consolidated equity and P&L presented by the Company do not differ from equity and P&L of the controlling entity presented in its individual financial statements. Accordingly, the Company's consolidated financial statements and the parent company's individual financial statements are presented in a single set, side by side.

The individual and consolidated financial statements were prepared under the historical cost convention, unless otherwise stated.

The individual and consolidated financial statements were prepared in the ordinary course of business and assuming that the Company will continue as a going concern. Management assesses the Company's ability to continue as a going concern in preparing the individual and consolidated financial statements.

3. Basis of preparation and presentation of financial statements (Continued)

3.1. Basis of preparation and presentation (Continued)

The individual and consolidated financial statements are presented in thousands of Brazilian reais (R$), and all amounts are rounded up to the nearest million, unless otherwise stated. In certain circumstances, this may result in non-significant differences between the sum of the amounts and the subtotals presented in the tables.

Additionally, the Company took into consideration the guidance set out in Accounting Guidance OCPC 07, issued by the CPC in November 2014, in the preparation of its financial statements. As such, significant information of the financial statements themselves is disclosed and corresponds to that used by management to manage the Company's operations.

2.1.1. Use of estimates

Preparation of the financial statements requires that management use estimates to record certain assets, liabilities and other transactions. As such, the financial statements of the Company and its subsidiaries include estimates referring to selection of useful life of property and equipment and investment properties, the required provisions for tax, civil and labor contingencies, allowance for expected credit loss, and fair value of investment properties, among others. Since these are estimates, variations may occur upon effective realization or settlement of the corresponding assets and liabilities.

2.1.2. Functional and presentation currency

The financial statements of each consolidated subsidiary are prepared using the functional currency of each investee. In defining the functional currency of each investee, management considered which currency significantly influences the selling price of the services provided and the currency in which most expenses with provision of services are paid or incurred. The consolidated financial statements are presented in reais, which is the functional and presentation currency of the Company and all its subsidiaries.

3. Basis of preparation and presentation of financial statements (Continued)

3.1. Basis of preparation and presentation (Continued)

2.1.3. Transactions and balances in foreign currency

When necessary, foreign currency transactions are translated into the functional currency at the exchange rate prevailing at the transaction date. Monetary assets and liabilities denominated in foreign currency are translated at the functional currency exchange rate in force as of statement of financial position date. Foreign exchange differences arising from such translation are recorded in the statement of profit or loss.

2.1.4. Basis of consolidation

The consolidated financial statements include the Company and its direct and indirect subsidiaries. The subsidiaries are included in the consolidation as of the date on which control is transferred to the Company and continue being consolidated through the date on which such control ceases to exist. Control occurs when the Company is exposed or has rights to variable returns based on its involvement with the investee and has the ability to affect such returns through power exercised over the investee. The Company controls an investee if, and only if:

- It has power in relation to the investee (i.e., existing rights that guarantee the current ability to direct the investee's significant activities);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- It has the capacity to use its power in relation to the investee to affect the amount of its returns.

It is generally assumed that a majority of voting rights results in control. In order to support this assumption and when the Company has less than the majority of the voting rights of an investee, it considers all the applicable facts and circumstances when assessing whether it has power in relation to an investee, including:

- The contractual agreement between the investor and other holders of voting rights;
- Rights arising from other contractual agreements; and
- The Company's voting rights and potential voting rights (investor).

3. Basis of preparation and presentation of financial statements (Continued)

3.1. Basis of preparation and presentation (Continued)

2.1.4. Basis of consolidation (Continued)

The Company evaluates whether it exercises control over an investee and if facts and circumstances indicate that there are changes in one or more of the three control elements mentioned above. Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ends when control thereover ceases to exist.

Assets, liabilities and P&L of a subsidiary acquired or disposed of in the year are included in the consolidated financial statements from the date on which the Company obtains control until the date it no longer has control over the subsidiary.

Profit or loss and each component of other comprehensive income are allocated to controlling and noncontrolling interests of the Company, even if this results in loss to noncontrolling interests. When necessary, adjustments are made to the financial statements of the subsidiaries to align their accounting policies with those of the Company. All assets and liabilities, P&L, revenues, expenses and cash flows of the same group, related to transactions between Company members, are fully eliminated upon consolidation.

A change in the equity interest of a subsidiary, without loss of control, is accounted for as an equity transaction.

If the Company loses control over a subsidiary, the corresponding assets (including any goodwill) and liabilities of the subsidiary are written off at book value on the date on which the control ceases to exist, in addition to the write-off of any noncontrolling interests on the date on which the control ceases to exist (including any components of other comprehensive income attributed thereto). Any resulting differences are recorded as gains or losses in P&L. Investments retained are recognized at fair value on the date control ceases to exist.

The consolidated financial statements of the Company include the following subsidiaries:

Parent company of the Group

The Company is directly controlled by shareholder Jaimes Bento de Almeida Junior.

The core activities of the Company's subsidiaries are summarized below:

3. Basis of preparation and presentation of financial statements (Continued)

3.1. Basis of preparation and presentation (Continued)

2.1.4. Basis of consolidation (Continued)

Direct and indirect subsidiaries

SNB Participações S.A: Headquartered in the city of Blumenau, state of Santa Catarina, this company was established on November 25, 1993 for the specific purpose of raising funds through issue of debentures that would be convertible into indivisible parts of the property under registration No. 22139 with the 1st Real Estate Registry Office of the Judicial District of Blumenau ("Property"), where building I of Shopping Neumarkt Blumenau was built. On January 1, 1994, the capital of this company was increased from CR$1,000,000.00 to CR$2,901,487,660.00, fully subscribed and paid up by NBS Shopping Centers Ltda. ("NBS"), through contribution of 19.90% of the indivisible parts of the Property, under the terms of the Special General Meeting held on January 1, 1994, registered with JUCESC on January 31, 1994 under registration No. R.15/22.139. The objective of the capital increase was to capitalize SNB with assets (in this case, 19.90% of the Property) to enable issue of debentures convertible into indivisible parts of the Property. On February 28, 1994, SNB conducted the public issue of 1,990 debentures that may be exchanged for indivisible parts of 19.90% of the Property.

Balneário Camboriú Shopping Participações Ltda.: This company was organized in order to hold interest in Balneário Shopping, located in Balneário Camboriú, state of Santa Catarina, and to explore this venture commercially.

GC Participações S.A.: This company was organized in order to hold interest in Continente Shopping, located in the city of São José, state of Santa Catarina, and to explore this venture commercially.

Joinville Shopping Participações S.A.: This company is primarily engaged in designing, developing, rendering feasible, implementing and holding direct or indirect interest in Garten Shopping, located in the city Joinville, state of Santa Catarina.

Blumenau Norte Shopping Participações S.A.: This company is primarily engaged in designing, developing, rendering feasible, implementing and holding direct or indirect interest in Norte Shopping, located in the city of Blumenau, state of Santa Catarina.

3. Basis of preparation and presentation of financial statements (Continued)

3.1. Basis of preparation and presentation (Continued)

2.1.4. Basis of consolidation (Continued)

Direct and indirect subsidiaries (Continued)

Nações Shopping Participações S.A.: This company was organized in order to hold interest in Nações Shopping, located in the city of Criciúma, state of Santa Catarina, and to explore this venture commercially.

Almeida Junior Gestão Shopping Centers Ltda.: The company is primarily engaged in (i) leasing kiosks, shop windows and providing merchandising services for shopping malls; (ii) providing intermediation services for space lease in shopping mall stores; (iii) advisory services for shopping malls; (iv) providing corporate advisory and consulting services; (v) holding interest in commercial ventures; and (vi) other activities related to its corporate purpose.

Central de Serviços Compartilhados AJ Ltda.: The company is primarily engaged in the provision of operating services in the shopping mall industry.

Shopping Park Ltda., SCP Estacionamento Continente Shopping, SCP Estacionamento Norte Shopping, SCP Estacionamento Nações Shopping and SCP Estacionamento Joinville Shopping: These companies manage and explore parking lots economically, and provide correlated services, respectively, in the following shopping malls: Shopping Neumarkt Blumenau and Balneário Shopping, Continente Shopping, Norte Shopping, Nações Shopping and Garten Shopping. The parking lots described as SCP were established as a “Silent Partnership”. Since Almeida Junior companies are ostensible partners, parking lot operations are consolidated by the Company and, subsequently, P&L attributable to noncontrolling interests is calculated.

Equity interest held in shopping malls: Almeida Junior holds direct or indirect interest in real estate ventures such as shopping malls, located in the state of Santa Catarina. The malls in operation are as follows:

3. Basis of preparation and presentation of financial statements (Continued)

3.1. Basis of preparation and presentation (Continued)

2.1.4. Basis of consolidation (Continued)

Direct and indirect subsidiaries (Continued)

Venture	Location	Commencement of operation	Direct/indirect interest held by the Company in 2025 and 2024
Neumarkt Shopping	Blumenau/SC	Sept 1993	93.80%
Balneário Shopping	Balneário Camboriú/SC	Oct 2007	79.10%
Garten Shopping	Joinville/SC	Apr 2010	81.65%
Norte Shopping	Blumenau/SC	May 2011	72.48%
Continente Shopping	Grande Florianópolis/SC	Oct 2012	67.15%
Nações Shopping	Criciúma/SC	Apr 2016	67.25%

The shopping malls were organized by means of a structure named “Indivisible Joint Ownership” or “Condominium”. As such, rather than holding a certain percentage of interest in the venture, condominium dwellers hold interest over the entire property, which is indivisible.

Shopping mall operations are stated in the Company’s accounting records in proportion to the interest held in the venture. The Company holds legal representation, administration, parking lot and commercial exploration of all aforementioned shopping malls.

The Company has no investments in associates or joint ventures. All Company investments are comprised of direct/indirect subsidiaries.

4. Significant accounting judgments, estimates and assumptions

Estimates and assumptions

Significant assumptions regarding sources of uncertainty in future estimates and other important sources of uncertainty in estimates at the statement of financial position dates, involving significant risk of causing a material adjustment in the book value of assets and liabilities in future financial years or periods are discussed below.

Judgments

The preparation of the Company's individual and consolidated financial statements requires that management make judgments and estimates and adopt assumptions that affect the amounts disclosed referring to revenues, expenses, assets and liabilities, as well as the disclosures of contingent liabilities, as at the date of the financial statements. However, the uncertainty related to these assumptions and estimates could lead to results that require significant adjustments at book value of assets or liabilities affected in future periods. In the process of applying the accounting policies adopted by the Company, management made the following judgments, which have a most significant effect on the amounts recognized in the consolidated financial statements:

Allowance for expected credit losses

Management sets up an allowance for ECL based on historical losses and an item-by-item analysis per customer, especially to assess whether there are guarantees that mitigate the risk of loss. This analysis takes into consideration amounts historically received from the customer, current financial status, and guarantees provided, among others. The purpose of this analysis is to ensure a more thorough evaluation in calculating the allowance for expected credit loss on accounts receivable of the Company and its subsidiaries. Information on expected credit losses on Company accounts receivable are disclosed in Notes 6 and 13.

Fair value of investment properties

The Company presents its investment properties at fair value, as required by IAS 40 / CPC 28, and changes in fair value are recorded in the statements of profit or loss. The Company had external experts determine the fair value of ventures as at December 31, 2025 and 2024. These experts used a valuation technique based on the discounted cash flow method, due to the lack of comparable market data and to the nature of the properties.

The fair value determined for the investment properties is sensitive to estimated gains as well as to the long-term vacancy rate. Significant assumptions used for determining fair value of these properties are provided in Note 8.

4. Significant accounting judgments, estimates and assumptions (Continued)

Estimates and assumptions (Continued)

Impairment of nonfinancial assets

An impairment loss exists when the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, which is the higher of fair value less cost to sell and value in use. Fair value less cost to sell is calculated based on information available about similar assets sold or market prices less additional costs to dispose of the asset item. The calculation of value in use is based on the discounted cash flow model. The cash flows are derived from the budget for the next ten years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the performance of the assets of the CGU being tested. The recoverable amount is sensitive to the discount rate used under the discounted cash flow method, as well as expected future cash receipts, and to the growth rate used for extrapolation purposes.

Taxes

There are uncertainties related to the interpretation of complex tax and social security regulations and to the amount and timing of future taxable profits. Given the broad spectrum of tax legislation as well as the long-term nature and complexity of existing contractual instruments, the differences between actual results and assumptions adopted or future changes in these assumptions might require future adjustments in tax income and expenses already recorded. As at the statement of financial position date, provisions for matters identified by the Company as risk of loss are recorded.Currently, the Company is not subject to any audit by tax authorities. Different interpretations may arise in a wide range of issues, depending on the conditions prevailing in the Company's domicile. The Company recorded no deferred income and social contribution tax assets on temporary differences and on income and social contribution tax losses, since there is no recent history of taxable profit.

Provisions for tax, civil and labor contingencies

The Company sets up provision for tax, civil and labor contingencies. The assessment of the likelihood of loss includes an analysis of available evidence, the hierarchy of laws, available case law, the latest decisions of courts of law and their relevance in the legal system, as well as the opinion of external legal advisors. The provisions are reviewed and adjusted to take into consideration changes in circumstances, such as the applicable statute of limitations, outcomes of tax audits or additional exposures identified based on new matters or court decisions.

5. Cash and cash equivalents, and restricted cash

5.1. Cash and cash equivalents

	Individual		Consolidated	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**
Cash on hand	**-**	-	**20**	10
Bank checking accounts	**23**	-	**23**	26
Short-term investments	**103,927**	20	**110,714**	125,572

Short-term investments, classified as cash equivalents, refer to notes backed by Interbank Deposit Certificates (CDI) from institutions considered top tier by management, whose yield is pegged to the DI rate and that may be redeemed in total or in part with no restrictions. These amounts are recorded at cost of acquisition, plus respective gains up to the statement of financial position date, as follows:

	Average yield – CDI %		Individual		Consolidated	
Financial institution	**12/31/2025**	**12/31/2024**	**12/31/2025**	**12/31/2024**	**12/31/2025**	**12/31/2024**
Banco Santander	**98.50%**	98.50%	**1,379**	20	**8,166**	4,435
Itaú Compromissada (a)	**102.00%**	103.50%	**55,404**	-	**55,404**	26,113
Itaú CDB (b)	**91.00%**	75.00%	**47,144**	-	**47,144**	95,024
			103,927	20	**110,714**	125,572

(a) Short-term fixed-income security in which the Company invests, whereby Itaú Unibanco commits to repurchasing the security at a pre-agreed amount, indexed to a percentage of the CDI. This is a low-risk investment with daily liquidity and predictable profitability, regardless of market volatility.

(b) Fixed income investment issued by Itaú Unibanco, with remuneration as a percentage of the CDI daily variation. It is a post-fixed committed investment that follows the market interest.

5.2. Restricted cash

The Company's restricted cash is linked to the financial operations of debentures issued by the parent company, as shown below:

Financial institution		Individual		Consolidated	
	Note	**12/31/2025**	**12/31/2024**	**12/31/2025**	**12/31/2024**
Kinea	Note 10 (b)	**-**	90	**-**	90
		-	90	**-**	90

6. Accounts receivable

Breakdown of accounts receivable

	Individual		Consolidated	
	12/31/2025	12/31/2024	12/31/2025	12/31/2024
Rents and assignment of right/initiation fees (a)	**11,130**	11,896	**68,602**	70,415
Other (b)	**641**	629	**8,457**	6,859
	11,771	12,525	**77,059**	77,274
Allowance for expected credit losses	**(4,034)**	(4,203)	**(26,295)**	(29,170)
	7,737	8,322	**50,764**	48,104
Current	**6,134**	5,716	**40,704**	36,535
Noncurrent	**1,603**	2,606	**10,060**	11,569

(a) This represents accounts receivable from storeowners subject to minimum lease amounts (fixed monthly amounts defined by contract), adjusted on a straight-line basis by the contractual rent increments, since lease agreements with mall store lessees are usually effective for five years, but as an exception, agreements under other conditions and effective for different terms may be entered into. This account also includes accounts receivable referring to percentage lease (calculated on revenues earned by storeowners), mall and media.

This also corresponds to the portion of accounts receivable from lessees referring to assignment of rights of use on venture exploration, adjusted on a straight-line basis, since the agreements referring to the assignment of rights of use with mall store lessees are usually effective for five years, but as an exception, agreements under other conditions and effective for different terms may be entered into.

(b) This mostly refers to revenue from exploration of parking lots, ventures and provision of mall administration services.

Aging list of accounts receivable

	Individual		Consolidated	
	12/31/2025	12/31/2024	12/31/2025	12/31/2024
Falling due				
Up to 30 days	**6,331**	4,976	**39,754**	34,544
From 31 to 60 days	**131**	82	**714**	560
From 61 to 180 days	**167**	162	**1,621**	1,513
From 181 to 360 days	**157**	13	**1,266**	925
Above 360 days	**1,603**	2,606	**10,060**	11,569
Overdue:				
Up to 30 days	**327**	308	**1,545**	1,579
From 31 to 60 days	**106**	86	**783**	651
From 61 to 180 days	**162**	341	**1,598**	2,288
From 181 to 360 days	**200**	907	**2,123**	4,183
Above 360 days (*)	**2,587**	3,044	**17,595**	19,462
Total	**11,771**	12,525	**77,059**	77,274

(*) The Company follows the policy of eliminating accounts receivable balances related to notes overdue for more than five years; however, the effective write-off of notes only occurs when the conditions for reimbursement of amounts, through administrative and legal proceedings, are exhausted.

6. Accounts receivable (Continued)

a) Changes in accounts receivable

	Individual		Consolidated	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**

Closing balance	**11,771**	12,525	**77,059**	77,274

b) Changes in the allowance for expected credit losses

	Individual		Consolidated	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**
Opening balance	**(4,203)**	(5,100)	**(29,170)**	(28,625)
Reversal / (set-up), net	**(307)**	(1,002)	**3,369**	(3,314)
Write-off of balances overdue > 5 years	**476**	1,899	**(494)**	2,769
Closing balance	**(4,034)**	(4,203)	**(26,295)**	(29,170)

Management sets up an allowance for ECL based on historical losses and an item-by-item analysis per customer, especially to assess whether there are guarantees that mitigate the risk of loss. This analysis takes into consideration amounts historically received from the customer, current financial status, and guarantees provided, among others. Therefore, the Company follows the policy of recording 100% of the allowance for receivables from inactive storeowners and active storeowners overdue for more than 360 days; percentages of 30% of the base value of active storeowners' notes overdue between 181 and 360 days; and 20% of the base value of active storeowners' notes overdue between 61 and 180 days. As from January 1, 2018, in order to comply with CPC 48 (IFRS 9), the Company adopted the simplified approach to record, on a prospective basis, an additional allowance amount and, at December 31, 2025, considered expected losses of 1.2% (1.2% at December 31, 2024), based on notes falling due and overdue from 01 to 60 days. The purpose of this analysis is to ensure a more thorough evaluation in calculating the allowance for expected credit loss on accounts receivable of the Company and its subsidiaries. This policy is consistent with previous years, and the Company has not identified any need to change it for 2025.

7. Investments

Investments in subsidiaries are as follows:

	Individual	
	12/31/2025	**12/31/2024**

		4,093,015	3,898,613	**1,677,414**	1,662,669	**2,415,601**	2,235,944	**302,593**	235,065	**302,511**	234,994

8. Investment properties

Fair value of investment properties was measured based on the Revenue Method through Revenue Cash Flow and Projected Expenses in order to determine market value of the ventures, supported by market evidence and at market rates. The fair value is supported by an internal valuation report prepared by the Company. Fair value was not determined based on observable transactions in the market due to the nature of the real properties and lack of comparable data. An income capitalization valuation method (discounted cash flow) method was applied (fair value hierarchy - level II).

Significant assumptions used for measuring fair value under the discounted cash flow method, adopting the projection nominal model, of investment properties were as follows:

	Significant assumptions for fair value measurement	
	2025	**2024**
Cash flow period	**10 years**	10 years
Capitalization rate	**From 7.00% to 8.25%**	From 6.50% to 7.50%
Occupancy rate	**96.9%**	95.4%
CAPEX - maintenance/gross revenue	**1% of operating income of shopping malls**	1% of operating income of shopping malls
Actual discount rate	**From 7.50% to 8.75%**	From 7.00% to 8.50%
Projected inflation	**3.50%**	3.50%

As at the statement of financial position dates, fair value of investment properties is as follows:

	Individual		**Consolidated**	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**
Construction cost of investment property	**240,051**	235,298	**1,080,242**	1,062,799
Fair value adjustment of investment property	**627,937**	537,507	**3,785,734**	3,394,426
Investment properties at fair value	**867,988**	772,805	**4,865,976**	4,457,225

8. Investment properties (Continued)

Changes in investment properties, considering the interest percentage held by the Company on each property, are as follows:

	Individual		Consolidated	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**
Opening balance	**772,805**	768,479	**4,457,225**	4,255,354
Direct operating expenses *	**4,753**	543	**17,443**	10,193
Gain on fair value update	**90,430**	3,783	**391,308**	191,678
Closing balance	**867,988**	772,805	**4,865,976**	4,457,225

(*) The amounts under item "Direct operating expenses" refer to investments made in investment properties, as well as allowances realized that generate income and cash flows for the venture.

The Company's and its subsidiaries' capacity to realize investment properties is subject to no restrictions. As such, the Company may purchase, build, improve or develop investment properties.

Under the discounted cash flow method, fair value is estimated using assumptions referring to rewards and liabilities inherent in ownership relating to the assets' life, including their outgoing or final amount. The methodology and model used to determine the fair value involved significant judgments and are based on assumptions adopted by the engaged external appraisers who supported the Company. This method involves projecting a series of cash flows on interest held in real properties. This series of cash flows is subject to a discount rate derived from the market in order to constitute the present value of the revenue flow associated with the asset. The final rate is usually computed separately and differs from the discount rate.

The length of the cash flow and specific timing of incoming and outgoing flows are determined by events such as rent reviews, lease renewals and corresponding re-lease, re-adequacy or renovation. Adequate length is usually determined by market behavior and real property class characteristics. Cash flow for the year is usually estimated as gross profit less vacancy costs, non-recoverable expenses, losses on receipt, lease incentives, maintenance costs, agency costs, and commission and other operating and administrative expenses.

8. **Investment properties** (Continued)

The series of periodical net operating income, together with an estimate of the final amount for the end of the projection period, is then discounted. Significant increases (decreases) in the estimated rent amount and rent increases per year on an isolated basis would result in significantly higher (or lower) fair value of the properties. Significant increases (decreases) in the long-term vacancy rate and discount rate (and final rate) on an isolated basis would result in lower (higher) fair value. As a rule, a change in the assumption made for the estimated rent amount generates: i) a similar change in the increase of rent per year and in the discount rate (and final rate); and ii) an opposing change in the long-term vacancy rate.

Below is an analysis of sensitivity of the asset amounts and respective adjustments in Company's P&L, in the case of changes in the discount and cap rates used for calculating fair value. The changes presented below consider expected, possible and remote scenarios.

	Effect of increase			Effect of decrease		
Sensitivity scenarios	**Actual discount rate**	**Amount of the asset**	**Changes in P&L**	**Actual discount rate**	**Amount of the asset**	**Changes in P&L**
Expected scenario	7.50% to 8.50%	4,865,976	-	7.50% to 8.50%	4,865,976	-
Possible (Δ% ≈ 25%)	9.38% to 10.94%	4,547,286	(318,690)	5.63% to 6.56%	5,322,907	456,931
Remote (Δ% ≈ 50%)	11.25% to 13.13%	4,209,965	(656,011)	3.75%to 4.38%	5,761,393	895,417

9. Other assets

At December 31, 2025 and 2024, the balance of other assets is classified as follows:

	Individual		Consolidated	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**
Amounts receivable - FII AJ Malls (*)	**14,594**	12,756	**29,120**	25,461
Advances	**1,321**	2,621	**5,272**	6,098
Taxes to be refunded	**321**	514	**1,115**	725
Other accounts receivable	**-**	403	**-**	1,141
	16,236	16,294	**35,507**	33,425
Current	**16,192**	3,533	**35,333**	7,417
Noncurrent	**44**	12,761	**174**	26,008

(*) Residual value receivable by parent and subsidiary Nações Participações from AJ Malls Fundo de Investimento Imobiliário, related to the acquisition of equity interest in the shopping malls that occurred in December 2023. The first installment in the amount of R$17,080, due in December 2024, is yet to be released for integration into the Company's cash. Until that occurs, the Company conservatively classifies this amount under the "noncurrent" category. The second and last installment matures on March 31, 2026. The amounts are adjusted monthly based on the SELIC rate.

10. Loans and debentures

The balance of loans and debentures and debt charges is broken down as follows:

Funders/Creditors	Effective rate	Beginning	Maturity	Guarantees	Individual 12/31/2025	Individual 12/31/2024	Consolidated 12/31/2025	Consolidated 12/31/2024

Detailed information on the characteristics of debentures of the Company and its subsidiaries is as follows:

(a) On February 28,1994, SNB conducted the public issue of 1,990 debentures that may be exchanged for ideal fractions of 19.90% of the real property. The debenture indenture establishes that the purpose of funds from such issue was: (i) equity interest in the real property registered under No. 22139 with the 1st Real Estate Registry Office of the Judicial District of Blumenau, state of Santa Catarina; and (ii) up to eleven percent (11%) of the funds raised from placement of the debentures was used to partially settle a debt with former Banco do Estado de São Paulo (BANESPA), by releasing the mortgaged fraction of referred to real property.From 2008 to 2015, Almeida Junior acquired 1,864 of the 1,990 debentures issued and exchanged with SNB 18.64% of the real property. Currently, SNB holds only 1.26% of the indivisible parts of this property, representing 126 debentures not exchanged yet. As at December 31, 2025, the Company was compliant with referred to obligations, described in the issue indenture.

10. Loans and debentures (Continued)

(b) On December 17, 2019, the Company conducted its 2nd issue of nonconvertible debentures, in two series, of Almeida Junior Shopping Centers S.A. for private placement. On August 17, 2020, the minutes of the SGM of the holders of these real estate receivables certificates ("CRI") were drawn up, which resolved to maintain the financial covenants provided for in the securitization documents. The new financial covenant of this contract provides for the maintenance of maximum net debt equivalent to R$1,250,000, together with the inclusion of a net debt/EBITDA covenant at a level yet to be defined and subsequently ratified at a Special General Meeting. In addition to this financial covenant, another indicator to be evaluated on a quarterly basis is the Debt Service Coverage Ratio - "DSCR" (average Free cash flow/average PMTs) below 1.10x. Additionally, the Company is compliant with these obligations as at December 31, 2025.

(c) On December 15, 2019, the Company conducted the first issue of single-series nonconvertible debentures, with security interest and additional personal guarantee, of Blumenau Norte Shopping Participações S.A. On August 17, 2020, the minutes of the SGM of the holders of these real estate receivables certificates ("CRI") were drawn up, which resolved to maintain the financial covenant provided for in the securitization documents related to the maintenance of a minimum Debt Service Coverage Ratio - "DSCR" (average Free cash flow/average PMTs) of 1.10x, to be assessed quarterly starting from April 2022. In August 2025, the Company fully settled these debentures.

(d) On December 15, 2019, the Company conducted the first issue of single-series nonconvertible debentures, with security interest and additional personal guarantee, of GC Participações S.A. On August 17, 2020, the minutes of the SGM of the holders of these real estate receivables certificates ("CRI") were drawn up, which resolved to maintain the financial covenant provided for in the securitization documents related to the maintenance of a minimum Debt Service Coverage Ratio - "DSCR" (average Free cash flow/average PMTs) of 1.10x, to be assessed quarterly starting from April 2022. In August 2025, the Company fully settled these debentures.

10. Loans and debentures (Continued)

(e) On January 15, 2020, the Company conducted the first issue of single-series nonconvertible debentures, with security interest and additional personal guarantee, of Nações Shopping Participações S.A. On August 17, 2020, the minutes of the SGM of the holders of these real estate receivables certificates ("CRI") were drawn up, which resolved to maintain the financial covenant provided for in the securitization documents related to the maintenance of a minimum Debt Service Coverage Ratio - "DSCR" (average Free cash flow/average PMTs) of 1.10x, to be assessed quarterly starting from April 2022. In August 2025, the Company fully settled these debentures.

(f) On September 9, 2020, subsidiary Joinville Shopping Participações S.A. issued nonconvertible debentures, with security interest and additional personal guarantee, in two series (CRI 114 and CRI 115), for private placement. The financial covenant relating to this agreement is calculated on a quarterly basis (from December 2021): on the consolidated balances, rate equal to or below 4.75x net debt/EBITDA ratio, without considering the effects of fair value adjustment of investment properties; even if referred to rate is not achieved, if debt is below R$1,225,000, default will not be characterized. In September 2024, the Company renegotiated these financial instruments, resulting in new interest rates and payment terms. These renegotiations were addressed within the scope of IFRS 9 - CPC 48, which stipulates the recognition of the impacts of a modification of the cash flows of the renegotiated financial instrument, resulting in an adjustment of the effective interest rate of the respective instruments, with distinct accounting treatments depending on the conditions of the renegotiation. The renegotiation of series 114 was classified as a modification, resulting in a revenue impact of R$806 thousand, while the renegotiation of series 115 was classified as an extinguishment, resulting in an expense impact of R$1,375 thousand. Both impacts were duly recognized under liabilities and P&L for the year, resulting in a net negative effect of R$568 thousand. Additionally, the Company is compliant with these obligations as at December 31, 2025.

(g) On August 27, 2024, subsidiary Joinville Shopping Participações S.A. issued a new subordinated series of debentures backed by CRIs for private placement. With statutory lien of 81.65% of the indivisible parts of the property owned by Almeida Junior Shopping Centers S.A., where Joinville Garten Shopping is located, in Joinville. The Financial Ratio of this contract must be equal to or less than 4.75x. Failure to comply with the Financial Ratio will not be considered an Early Maturity Event if the Net Debt remains equal to or less than R$1,225,000. In addition to this financial covenant, another indicator to be evaluated quarterly is the Debt Service Coverage Ratio - "DSCR" (average Free cash flow/average PMTs) with a minimum of 1.25x. Additionally, the Company is compliant with these obligations as at December 31, 2025.

10. Loans and debentures (Continued)

(h) On August 29, 2024, parent Almeida Junior Shopping Centers S.A. issued nonconvertible debentures backed by CRIs for private placement, with statutory lien of 51% of the indivisible parts of the property owned by Almeida Junior Shopping Centers S.A., where Neumarkt Shopping is located, in Blumenau, and statutory lien of receivables from the Neumarkt Shopping project, also owned by Almeida Junior. The Net Debt must remain equal to or less than R$1,250,000. This amount may be exceeded provided that the Financial Ratio of this contract remains at a maximum of 4.95x. In addition to this financial covenant, another indicator to be evaluated on a quarterly basis is the Debt Service Coverage Ratio - "ICSD" (average Free cash flow/average PMTs) of 1.20x.Additionally, the Company is compliant with these obligations as at December 31, 2025.

(i) On December 12, 2025, subsidiaries GC Participações S.A. and Nações Shopping Participações S.A. issued debentures totaling R$260,000, distributed in two series, as follows: i) first series totaling R$210,000, maturing in 6 years, with semi-annual amortization as from the 48th month and conventional interest composed of the CDI + 0.55% p.a., amortized monthly from the issue date; and ii) second series totaling R$50,000, maturing in 10 years, with customized monthly amortization and conventional interest composed of the IPCA + 8.58% p.a., amortized monthly from the issue date. The agreement provides for the following guarantees: (i) cross-guarantee from GC Participações S.A., Nações Shopping Participações S.A. and Almeida Junior Shopping Centers S.A.; (ii) fiduciary transfer, subject to a suspensive condition, of property owned by Norte Shopping, observing a maximum loan-to-value ("LTV") ratio of 65%; (iii) fiduciary assignment, subject to a suspensive condition, of the rent and parking receivables from Norte Shopping and Nações Shopping. The financial covenants of this contract correspond to:(i) DSCR: higher than or equal to 1.10x, to be calculated based on the flow of receivables from the fiduciary assignment; (ii) prior to full redemption of Joinville CRIs: Maximum net debt of R$1,225,000 (it will not be considered an Early Maturity Event if the Net Debt/EBITDA remains lower than or equal to 4.75x, to be calculated based on the consolidated balances of Almeida Junior Shopping Center S.A.);(iii) after full redemption of Joinville CRIs: maximum net debt of R$1,250,000. It will not be considered an Early Maturity Event if the Net Debt/EBITDA remains lower than or equal to 4.95x, to be calculated based on the consolidated balances of Almeida Junior Shopping Center S.A. Additionally, the Company is compliant with these obligations as at December 31, 2025.

10. Loans and debentures (Continued)

As at December 31, 2025 and 2024, aging list of long-term loans and debentures is as follows:

	Individual		Consolidated	
	12/31/2025	**12/31/2024**	**12/31/2025**	**12/31/2024**
From 13 to 24 months	**42,695**	23,090	**63,380**	67,486
From 25 to 36 months	**38,219**	26,943	**55,163**	87,761
From 37 to 48 months	**262,325**	37,302	**323,093**	105,961
After 48 months	**321,395**	588,322	**746,969**	879,533

(a) This refers to funds lent to the condominiums as a supplement to monthly cash flow (when necessary), or for marketing initiatives conducted by the Promotion Funds to increase sales and the flow of the shopping malls. The balance will be settled gradually, according to the projected cash flow, without an established maturity date. The Company assesses periodically the recoverability of these balances and sets up provision based on the projected cash flows of the respective counterparties.

(b) This refers to funds made available under a checking account for the composition of the monthly cash flow (when necessary). These amounts are not updated, have no maturity date and the balance will be settled gradually, according to the projected cash flow.

(c) Refers to funds made available by shareholder Jaimes Bento de Almeida Junior in the total amount of R$54,344, as declared at the Special General Meeting held on December 17, 2025.The amount bears no interest or monetary restatement and matures in up to five (5) years from the disbursement date. In accordance with current accounting standards, the transaction is being accounted for as an interest-free intercompany loan and was measured at its present value on initial recognition, using a discount rate that reflects market terms for similar transactions (CDI), and the initial adjustment in the amount of R$4,590 (of which R$251 was recognized in P&L in December 2025) was posted to equity as a shareholder capital contribution.

Revenue from administration fees amounting to R$19,344 at December 31, 2025 (R$14,094 in 2024) comprises amounts billed to related parties referring to the provision of administration services to commercial condominiums, promotion funds and noncontrolling land owners.

13. Information on transactions and balances with related parties (Continued)

Guarantees

The Company and its subsidiaries provide guarantees related to the Debentures described in Note 10, which are granted to financial institutions, such as surety bond, fiduciary transfer of the Malls or fiduciary assignment of receivables from store lease agreements. Also, as presented in Note 5.2, there were restricted cash balances linked to certain financial transactions.

The Company, its controlling shareholder, the subsidiaries and associates, including commercial condominiums and promotional and advertising funds of the shopping malls, as the case may be, carry out commercial and financial transactions with each other, in the ordinary course of their business, and may also provide guarantees in financial operations of loans and financing, as described in Note 10.

Key management personnel compensation

Key management personnel include the Board of Directors members and statutory and non-statutory directors, whose duties involve decision-making power and control over Company activities. Key management personnel compensation is classified as a short-term benefit and totaled R$8,357 at December 31, 2025 (R$8,412 at December 31, 2024). This amount includes short-term benefits, which correspond to: (i) management fees or fees paid to the executive board and to the Board of Directors members; (ii) bonuses paid to the executive board and (iii) other benefits like healthcare plan. The Company does not grant post-employment benefits or severance pay to its management, besides the benefits provided for by applicable legislation.

Key management personnel receive no long-term benefits such as pension plan or share-based payment.

14. Provision for contingencies

The Company and its subsidiaries figure as parties in legal and administrative proceedings of a tax, civil, labor and other nature, arising from the ordinary course of business.

14. Provision for contingencies (Continued)

The Company and its subsidiaries record provisions for contingencies to cover legal and administrative matters of a tax, civil, labor and social security nature, assessed as probable loss by their legal advisors, the settlement of which is expected to result in an outflow of economic benefits, in an amount that can be reliably estimated. The provisions are reviewed and adjusted to take into consideration changes in circumstances, such as the applicable statute of limitations or additional exposures identified based on new matters. Changes in provision for contingencies, subject to provisioning, which are deemed sufficient by management, based on the opinion of internal and external legal advisors, including contingencies of a social security nature, are summarized as follows (individual and consolidated):

	Provision for labor, social security and civil contingencies Individual	Provision for labor, social security and civil contingencies Consolidated
Balance at December 31, 2023	14,723	21,973
Provision	3,622	6,373
Reversal of provision	(1,451)	(3,318)
Balance at December 31, 2024	16,894	25,028
Provision	**3,461**	**5,853**
Reversal of provision	**(1,719)**	**(2,004)**
Balance at December 31, 2025	**18,636**	**28,877**

a) Proceedings assessed as possible loss

As at December 31, 2025 and 2024, proceedings of a tax, civil, labor and administrative nature whose likelihood of loss was assessed as possible by Company legal advisors are as follows:

	Consolidated	
	12/31/2025	**12/31/2024**
Labor	**80**	-
Civil	**9,270**	107,901
Tax	**21,563**	25,116
	30,913	133,017

Civil

The Company figures as party in various proceedings of a civil, administrative and labor nature, considered usual in the ordinary course of business. Apart from the proceedings detailed below, no other proceedings are considered relevant. In the year ended December 31, 2025, the Company reviewed the proceeding base and reflected some changes in loss perspective.

14. Provision for contingencies (Continued)

a) Proceedings assessed as possible loss (Continued)

Civil (Continued)

Marialva Proceeding

The Company and others are parties to Proceeding No. 1143239-30.2003.8.13.0672 and related cases involving the Bankrupt Estate of Marialva Construtora Ltda. and Marialva Empreendimentos Ltda. (collectively, the "Bankrupt Estate of Marialva"). The Company was involved in the aforementioned proceedings due to the business partnership between Marialva Construtora and NBS Shopping Centers Ltda. ("NBS") for the construction of the Neumarkt Blumenau Shopping Mall in 1991.

Marialva held 19.09% of the share capital of NBS and 126 debentures issued by SNB Participações S.A., convertible into an indivisible portion of 1.26% of the property registered under No. 22139 with the Real Estate Registry (RGI) of Blumenau/SC ("Indivisible Portion of 1.26% of the "Property" and "Property", respectively – an original development of the Neumarkt Blumenau Shopping Mall). In 1996, due to the breakdown of the *affectio societatis*, the Company decided to exclude Marialva from the NBS partnership. In 2000, with the declaration of Marialva's bankruptcy, the collection of the interest previously held by Marialva in NBS was ordered, resulting in various litigation fronts involving the Company, NBS, SNB, and the Condominium. In 2012, a court auction of the collected assets was held, and the Company acquired all of the NBS shares (19.09%) previously held by Marialva.

The main ongoing proceedings relate to specific matters involving: (i) the possible determination of any amounts allegedly not paid to the Bankrupt Estate of Marialva in connection with its equity interest in NBS, for the period between its removal as a shareholder (1996) and the auction purchase of such interest by the Company (2012), with any liability in this respect resting with NBS (an entity not controlled by the Company), and the case is currently pending approval of the agreement entered into between the parties; (ii) the restitution of Company assets that were improperly collected and rendered unavailable within the scope of the bankruptcy, including a 3.5518% equity interest in Shopping Neumarkt; and (iii) burden of defeat disputed in procedural incident No. 2874856-71.2008.8.13.0672, as established in the dismissed objection filed by NBS against the collection of Marialva's interest held in its corporate structure, whose liability also rests with NBS.

On October 02, 2025, in the trial of Special Appeals Nos. 2.111.295 and 2.111.530, the Brazilian High Court of Justice (STJ) set aside the full collection of the daily fines that were the subject of the judgment enforcement proceedings filed in 2017 by the Bankrupt Estate against SNB and the Civil Condominium of Shopping Neumarkt.

Civil (Continued)

Marialva Proceeding (Continued)

The Company also clarifies that: (i) the only existing collections are illiquid; and (ii) all collections for which the parties have been summoned for payment are fully guaranteed by surety insurance or bank guarantees, with objections and/or appeals pending analysis to recognize the unenforceability and/or non-existence of these debts.

Additionally, on October 20, 2025, a Settlement Agreement was executed in the context of the bankruptcy proceedings and related matters involving the Bankrupt Estate of Marialva, in the amount of R$61,972. The agreement sets forth obligations intended to resolve and bring to a close specific disputes related to the bankruptcy liabilities and related procedural incidents, and remains subject to lower court approval.

Notwithstanding the execution of the agreement, the Company emphasizes that, on the merits of the dispute and the underlying corporate relationship, the primary party responsible for payment is NBS Shopping Centers Ltda., as it is the entity directly linked to the determination of amounts and to the discussions regarding Marialva's removal and its former interest in the capital (a responsibility acknowledged by NBS itself). In addition, the piercing of the corporate veil of NBS and the resulting successor liability of the Company are still awaiting a final decision in the bankruptcy proceeding.

Sistel Proceeding

On May 28, 2003, in order to state its right, the Company filed lawsuit No. 0025039-34.2003.8.26.0506 before the Eighth Civil District Court of Ribeirão Preto, State of São Paulo, against Fundação Sistel de Seguridade Social ("Sistel"), seeking the reimbursement of losses incurred related to the contract entered into for the construction of Shopping Center Santa Úrsula, in the city of Ribeirão Preto, State of São Paulo, having requested Sistel to be ordered to pay the amounts it undertook to invest in the venture, since Sistel stopped investing the agreed upon amounts.

14. Provision for contingencies (Continued)

a) Proceedings assessed as possible loss (Continued)

Civil (Continued)

Sistel Proceeding (Continued)

On July 24, 2007, the São Paulo State Court of Justice ("TJSP") ordered Sistel to fully pay the amounts it committed to invest and that were required for the management of the Mall, and that decision gave rise to Almeida Junior's credit right, the amount of which should be determined in that settlement proceeding.

The decision became final on March 3, 2010, with Sistel submitting the request for settlement on September 27, 2010, in which the incidence of interest on the amount owed to Almeida Junior is still being debated.

On October 26, 2020, Almeida Junior initiated the provisional enforcement of the judgment, whereby Almeida Junior requested Sistel be summoned to pay R$40,834, at the risk of placing a property lien on Sistel's assets. Finally, the Company and its legal advisors are daily monitoring the developments of the proceeding, which awaits judgment by the STF, and any impacts thereof, in order to streamline the process of internalization of such amounts.

As a result of the discussion on the matter, the Company recorded, as required, the principal amount of R$8,218 (R$7,458 net of taxes) in 2020, and as at March 31, 2021, recorded R$2,555 as monetary restatement (R$2,319 net of taxes) related to the amounts in connection with the final and unappealable decision, and recorded the asset in Other accounts receivable and Other operating income (expenses). Management decided to discontinue recognizing monetary restatement, in light of the developments in the proceeding and uncertainties about the timeline for the case to reach a conclusion.

Labor

No labor claim in which the Company or one of its subsidiaries figures as a party was considered individually significant.

Tax

The Company is a party to tax proceedings, which are under discussion at the administrative level, referring to IRPJ, CSLL, PIS and COFINS delinquency notices received in 2005, 2010 and 2017 amounting to R$21,563. Neither of these proceedings was considered individually significant.

15. Equity

a) Capital

On December 18, 2025, the Company's capital was paid in in the amount of R$672,784 (R$458,506 from the balance of dividends paid out and R$214,281 from profits for 2025), through the issue of 49,338,983 new common shares. As a result, the Company's capital increased to R$1,021,077, represented by 179,338,983 common shares. On the same date, the Company also capitalized retained earnings totaling R$1,102,879 by capitalizing the full unrealized income reserve, with no issue of new shares. At December 31, 2025, the Company's fully subscribed and paid-in capital amounts to R$2,123,956 (R$348,293 at December 31, 2024). Equity interest and number of common shares with no par value are held as follows:

	Common shares			
	12/31/2025		12/31/2024	
Shareholder	**Number**	**%**	**Number**	**%**
Jaimes Bento de Almeida Junior	**179,338,982**	**99.9999**	129,999,999	99.9999
JAJ Brasil Investimentos e Part. Ltda.	**1**	**0.00001**	1	0.00001
Total shares	**179,338,983**	**100.00000**	130,000,000	100.00000

The Company is authorized to increase its capital, through resolution of the Board of Directors, irrespective of statutory amendment, up to the limit of 250,000,000 (two hundred and fifty million) registered common shares with no par value.

b) Income reserves

Legal reserve: Legal reserve is set up at 5% (five percent) of net income for the year, capped at 20% (twenty percent) of capital, under the terms of the Brazilian Corporation Law and the Company's Articles of Incorporation. The legal reserve may be used for increasing capital or absorbing losses, not for dividend distribution purposes.

Unrealized income reserve: The remaining profits are maintained in the reserve account to be allocated at the discretion of the shareholders' meeting.

On April 30, 2025, by means of the Annual General Meeting, Company shareholders approved the proposed allocations of net income for 2024, and income in excess of the amounts distributed was allocated to the unrealized income reserve.

15. Equity (Continued)

c) Equity adjustments

Equity adjustments and other comprehensive income balances comprise fair value adjustment of investment property, occurring before 2010. Due to adoption of IFRS, as from 2010, fair value adjustments of investment property are recorded directly in P&L. Equity adjustment balance (net of income and social contribution taxes) relating to fair value adjustment of investment property amounts to R$226,423 at December 31, 2025 (R$226,423 at December 31, 2024).

d) Dividends

	Dividend calculation	
	12/31/2025	**12/31/2024**
Net income for the year – parent company	**301,994**	171,522
Legal reserve	**(15,100)**	-
Minimum dividend calculation basis	**286,894**	171,522
	25%	25%
Mandatory minimum dividend	**71,724**	42,881

16. Earnings per share

Calculation of the weighted average of outstanding shares and earnings per Company share for the years ended December 31, 2025 and 2024 is as follows:

	Year ended	
	12/31/2025	**12/31/2024**
Basic numerator:		
Net income for the year	**302,045**	171,522
Denominator (in thousands of shares):		
Weighted average of basic number of common shares	**131,892,000**	130,000,000
Earnings per share – R$	**2.28970**	1.31940

At December 31, 2025 and 2024, the Company has no equity instruments with dilutive capital effect.

17. Operating revenue, net

Net revenue from leases and services is as follows:

	Individual		Consolidated

22. Insurance coverage

The Company has a risk management program in order to manage, limit and mitigate risks for the shopping malls, seeking market coverage compatible with its size and operations. This insurance program includes various types of coverage for each venture, mainly for property and civil liability risks. Coverage is subject to conditions and exclusions provided for in the respective insurance policy clauses, among which exclusion of damages caused by terrorist acts.

The insured amounts were determined and contracted on technical bases, using valuation reports from specialized companies, for the amounts indicated below, and are considered sufficient by management to cover any losses due to claims involving permanent asset items and loss of profits, considering the nature of its activity, the risks involved in its operations and the guidance provided by its insurance advisors. Insurance deductibles vary depending on the events insured. As at December 31, 2025, the Company had the following major insurance policies contracted from third parties:

Risks covered	Insurer	Coverage	Amount insured
Named perils – basic coverage (i)	AXA Seguros	07/01/2025 to 06/30/2026	**2,653,000**
Loss of profits	AXA Seguros	07/01/2025 to 06/30/2026	**731,038**
Civil liability	Fator Seguradora	07/01/2025 to 06/30/2026	**50,000**
D&O Directors & Officers	Austral Seguradora	07/01/2025 to 06/30/2026	**10,000**

(i) Fire, collapse, explosion, electrical damage and others.

The insurance policies taken out for the Company's shopping malls may not cover certain risks (such as war, terrorism, acts of God and force majeure, liabilities for certain environmental damage or pollution, or interruption of certain activities). Therefore, in the event of occurrence of any of these uncovered events, the investment made in the respective shopping mall may be lost in whole or in part, forcing the Company to incur additional costs for its recomposition, renovation and compensations, resulting in losses for the shopping mall and for the Company. The Company cannot ensure that, in the event of the occurrence of a claim, even if covered by its contracted insurance policies, the payment of compensation by the insurer will be sufficient to fully cover the damages arising from such claim. In addition, as a shopping mall administrator, the Company may be held subsidiarily liable for failure to obtain or renew licenses and authorizations. Finally, the Company cannot ensure that, in the future, it will be able to renew insurance policies under better or, at least, under the same conditions as contracted, which may have a material adverse impact on its business and results.

23. Commitments

Commitments with suppliers

The main commitments with suppliers refer to expenses inherent in developing the ventures' business. At December 31, 2025, the estimated amount of disbursement in the short and the long term referring to ongoing ventures totals R$6,275 and R$2,094, respectively (R$4,922 at December 31, 2024 in the short term).

Lease commitments

At December 31, 2025, Almeida Junior Shopping Centers had R$731 in lease commitments, related exclusively to the property leased by the Company (R$1,392 at December 31, 2024).

24. Financial instruments and risk management

24,1. Risk factors that may impact the Company's and its subsidiaries' business

The Company and its subsidiaries may be exposed, in view of their activities, to the following financial risks:

- Credit risk;
- Liquidity risk;
- Market risk;
- Operational risk.

Similarly to all other businesses, the Company is exposed to risks deriving from use of financial instruments, whose risk exposure limits are approved and reviewed periodically by management. This note brings information on the Company's exposure to each of the foregoing risks, as well as its objectives, policies and processes for measuring and managing such risks, capital management and methods used to measure them.

Enhanced quantitative disclosures regarding these risks are provided throughout these financial statements.

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

No material change occurred in the risk exposure of the Company's financial instruments, objectives, policies and processes for managing these risks or the methods used for measuring them based on prior years, unless otherwise specified in this note.

As at the statement of financial position date, the Company informs that the Company and its subsidiaries engage in no transactions involving derivative financial instruments, being therefore not exposed to any risk deriving from instruments of this nature.

Based on its market risk strategy, the Company is of the understanding that contracting hedging instruments was not required, besides the risk insurance policy contracted. This position may be reviewed if, in the future, any incompatibility that may cause risks to the Company's operating and finance income is identified.

Credit risk

This risk arises mainly from accounts receivable, relating to lease and assignment of rights of the Company and its subsidiaries. This risk is related to the possibility that the Company will incur losses due to collection difficulties or noncompliance, by a customer or counterparty in a financial instrument, of their contractual obligations.

Company operations are related to lease of commercial spaces and administration of shopping malls. Lease agreements are governed by lease legislation, and the Company's customer portfolio is dispersed and constantly monitored in order to mitigate losses due to default. The lease agreements may include a grantor, which mitigates Company credit risk.

Accounts receivable from lease and other receivables mainly refer to storekeepers of the malls in which the Company holds interest. The Company records provision for impairment, representing its estimated losses to be incurred relating to trade accounts receivable and other receivables and investments.

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Credit risk (Continued)

The Company monitors its receivables portfolio from time to time. The Company's lease activity has specific rules on default, and the operations and legal departments actively negotiate with debtors. When taken back or returned, the sales point at the malls is immediately renegotiated with another storeowner.

The measure adopted to mitigate credit risk is to always maintain good storeowner quality and an active commercial area for immediately supplying any potential vacancy in the venture, which may be renegotiated profitably.

A portion of Company revenues is subject to very low credit risk: parking lot revenue and revenue from services provided.

Customer portfolio of the Company and its subsidiaries is quite dispersed. As such, as at December 31, 2025, no customers, individually or in the aggregate, represent 5% or more of accounts receivable at the statement of financial position date.

Management is of the belief that maximum credit risk exposure of Company financial assets is represented by accounts receivable balances recorded in the statement of financial position. Credit risk in connection with customers is estimated and disclosed in a specific explanatory note. The Company and its subsidiaries limit their risks by applying 100% cash and cash equivalents in top-tier financial institutions; for this reason, management does not consider these instruments subject to significant credit risk.

Management considers the credit risk arising from transactions with related parties to be low. These transactions mainly comprise loans to the condominiums and promotion funds to supplement and balance monthly cash flows, being temporary and for operating purposes. The Company periodically assesses the recoverability of these balances and recognizes allowance based on the history of receivables and the cash-generation capacity of the ventures.

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Liquidity risk

Decisions on investments of the Company and its subsidiaries are taken based on elimination or mitigation of the risks and impacts of liquidity, avoiding to assume long-term cash flow exposure. The policy adopted by the Company is to use assumptions on minimum cash balances, which vary according to the investment timeline, and on financial coverage of obligations, where the projected cash generation must exceed the obligations contracted (loans, financing, capex, expansion works and greenfield investments), thus mitigating the refinancing risk of debts and obligations. In order to fund ventures under construction, the Company seeks to structure long-term operations in the financial market, whose grace period allows alignment with the expected cash generation. Results from these activities are consistent with the risk policies and strategies defined by Company management.

Aging list of amortization of non-derivative financial liabilities, under contractual conditions, are presented below. The flow presented was not discounted and includes interest and adjustment by contractual indexes based on respective projected rates as at the statement of financial position date, published by Focus Report of the Central Bank of Brazil:

	Consolidated			
	12/31/2025

	74,844	198,594	1,076,401	1,349,839

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Market risk

The Company, as well as other companies in the retail segment, is exposed to inflation risk, since such risks put pressure on income of the families, thus reducing retail consumption. In the projection models used for determining Company strategies, different inflation levels are used in order to establish scenarios for Company development.

Major strategies adopted by the Company to hedge against market risk are as follows: (a) compatibility between the terms of its debt instruments (term, interest rate, indexation) as well as payment flow and its assets' cash-generating capacity; (b) continuous monitoring of the Company's cash generation as compared with commitments; (c) dispersion of Company revenues in various ventures established in cities with adequate consumption potential, as well as a balanced distribution of ventures' stores in various retail segments and in line with the region's consumption potential; (d) periodical analysis of the capacity to receive rent from storeowners and assignments of right; (e) maintenance of short-term investments in highly-liquid CDI-backed instruments at banks that management considers top tier.

Market risk is divided into currency risk, interest rate risk and fair value risk, as follows:

Currency risk

The Company is not subject to currency risk, since all receivable and payable transactions are carried out in domestic currency. In addition, the Company has no assets or liabilities subject to foreign currency fluctuation.

Interest rate risk

The Company is subject to increase in interest rates and price rates, since it takes out financing indexed by such rates.

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Market risk (Continued)

Interest rate risk (Continued)

The Company records financial assets and liabilities at fair value through profit or loss. However, to mitigate this effect in the medium and long term, whenever possible, the Company opts for low volatility indexes in order to more accurately estimate its future disbursements.

This risk derives from the possibility that the Company will incur losses due to interest rate variations that increase finance costs relating to loans and financing raised in the market. The Company continuously monitors market interest rates in order to evaluate and hedge against these rates' volatility.

Sensitivity analysis of interest rate

In compliance with the provisions of CPC 40 (R1), which addresses Financial Instruments: Recognition, Measurement and Disclosure, the Company is disclosing a sensitivity analysis table for market risks considered significant by management, originated by financial instruments, to which the Company is exposed at year end, including all transactions involving derivative financial instruments.

The Company and its subsidiaries have short-term investments, loans, financing and debentures pegged to certain financial indexes.

For sensitivity analysis purposes, the annual projection of risk variables was prepared based on projected market rates, provided by the Central Bank of Brazil. In preparing this sensitivity analysis, the Company and its subsidiaries adopted the following assumptions:

- Definition of a probable scenario for risk behavior, which may be understood as fair value of short-term investments, debentures and loans, was referenced by the independent external source Focus Report issued by the Central Bank of Brazil.

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Market risk (Continued)

Sensitivity analysis of interest rate (Continued)

- Definition of two additional scenarios, with deterioration of 25% (possible scenario) and of 50% (remote scenario) on the risk variable used in the probable scenario.

- The analysis projects the effects of scenarios indicated above in Company P&L for the next twelve months, based on the balances of financial instruments at December 31, 2025.

- This projection also includes interest on operations at fixed rates with a view to providing a more thorough perspective on Company finance income (costs).

As at December 31, 2025, sensitivity analysis of major financial assets and liabilities, exposed to interest rate variables and adjustment indices of the Company and its subsidiaries, and respective impacts on P&L over a year are as follows:

		Consolidated			
			Interest income (expense)		
Operation	**Index/rate**	**Balance at 12/31/2025**	**Probable scenario**	**Possible scenario**	**Remote scenario**

Market risk (Continued)

Fair value risk

Management believes the carrying amount of financial assets and liabilities not presented in this note approximates fair value. The fair values and carrying amounts of financial assets and liabilities are stated in the statement of financial position, as follows:

	Consolidated					
	12/31/2025		12/31/2024		Valuation criterion	Classification
	Carrying amount	Fair Value	Carrying amount	Fair value		
Financial assets						
Cash and cash equivalents and short-term investments	**110,757**	**110,757**	125,608	125,608	Fair value	Fair value through profit or loss
Restricted cash	**-**	**-**	90	90	Fair value	Fair value through profit or loss
Accounts receivable	**50,764**	**50,764**	48,104	48,104	Amortized cost	Amortizable cost
	161,521	**161,521**	173,802	173,802		
Financial liabilities						
Debentures	**1,215,550**	**1,562,641**	1,203,893	1,385,418	Amortized cost	Amortizable cost
Loans	**18,040**	**18,040**	-	-		
Trade accounts payable	**8,369**	**8,369**	4,922	4,922	Amortized cost	Amortizable cost
	1,241,959	**1,589,050**	1,208,815	1,390,340		

Fair value hierarchy

The Company uses the table below to present financial instruments measured at fair value, under a valuation method. The different levels were defined as follows:

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Market risk (Continued)

Fair value hierarchy (Continued)

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets and liabilities;
- Level 2 - Inputs, except quoted prices, included in Level 1 that are observable for the asset or liability, directly (prices) or indirectly (derived from prices);
- Level 3 – Assumptions, for the asset or liability, not based on observable market data (non-observable inputs).

At the statement of financial position dates, management adopted level 2 for measuring fair value applicable to Company financial instruments. Level 3 was used for the fair value of investment properties.

Criteria, assumptions and limitations used in fair value calculation

Estimated fair value of the financial instruments – assets and liabilities of the Company and its subsidiaries were grouped as follows. The Company and its subsidiaries do not operate in the derivatives market, nor do they have other derivative financial instruments recorded as at December 31, 2025.

Cash and cash equivalents and short-term investments

Market value of bank account balances are equal to their book balances. The Company considered that these are valued at fair value based on probable realizable value. For other short-term investments, market value was computed based on market quotations. In cases in which no market quotations were available, market value was based on future cash flows, discounted at the average rates available.

Accounts receivable

Fair value of receivables from third parties is similar to their book balances.

24. Financial instruments and risk management (Continued)

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Market risk (Continued)

Loans and financing

The balances of loans and financing were measured at fair value for disclosure purposes.

Limitations

Market values were estimated as at the statement of financial position date, based on "significant market information". Changes in assumptions may significantly affect the estimates presented.

Operational risk

Since Company revenues are directly related to the capacity to lease commercial spaces in Company ventures, management periodically monitors their operating conditions in order to foresee potential impacts. As such, commercial spaces are traded by a specific team in order to ensure that negotiations with storeowners are in line with the shopping malls' mix and marketing strategy. However, Company ventures are maintained and their expansions and new developments managed by a specific team, i.e., specialized companies with widely known operational qualification are contracted to perform the construction works and improvements so that compliance with the approved budget is guaranteed.

Risks are monthly reviewed by the operating and financial boards which generate monitoring reports. In case noncompliance situations are identified, reviews of Company strategies are submitted to approval of the Executive Board in order to be implemented.

The Company monitors performance of the shopping malls in operation and under development based on a budget approved on an annual basis. This system allows the Company to monitor and validate disbursements in advance in light of the budgeted amounts, as well as the financial and operating performance of investments, and to closely monitor the evolution of Company liquidity focused on the long and short term.

24.1. Risk factors that may affect the Company's and its subsidiaries' business (Continued)

Operational risk (Continued)

Capital management

The Company's objectives in managing its capital are to safeguard its ability to continue as a going concern to provide returns for its shareholders and benefits for other stakeholders, as well as to maintain an optimal target capital structure to support its business and maximize value to shareholders.

To maintain or adjust capital structure, the Finance Board, as well as other areas, seek to balance profitability and risks incurred, in order not to expose Company equity or be subject to abrupt price or market variations. In order to manage capital in a healthy manner, the Company's policy is to preserve liquidity by closely monitoring short and long-term cash flow. To this end, the Company may adjust the dividends paid out to shareholders, return capital or issue new shares. The Company's capital management policy did not change as compared with prior years and the Company and its subsidiaries, associates and joint ventures are not subject to externally imposed capital requirements. The debt ratio table, which demonstrates net debt-to-equity ratio, is as follows:

	Consolidated	
	12/31/2025	**12/31/2024**
Debentures	**1,233,590**	1,203,893
Loans	**18,040**	-
Cash and cash equivalents	**(110,757)**	(125,608)
Restricted cash	**-**	(90)
Net debt	**1,140,873**	1,078,195
Equity	**2,441,070**	1,747,681
Net debt ratio	**46.7%**	61.7%

25. Operating leases

As at December 31, 2025 and 2024, the Company leases spaces in shopping malls under operating lease agreements. These leases are usually effective for 5 (five) years and may be renewed after this period. As an exception, certain agreements may be subject to different periods of effectiveness or conditions.

Minimum lease payments are adjusted annually, at market rates. In addition, certain leases provide for additional rent payments, which are based on changes in local price rates.

Future minimum rent amounts to be billed on non-cancellable operating leases considering stores in operation as at December 31, 2025 are as follows:

Year	12/31/2025		12/31/2024	
2025	**-**	**-**	123,638	29%
2026	**140,286**	**30%**	111,710	26%
2027	**118,206**	**25%**	85,457	20%
2028	**88,781**	**19%**	52,923	13%
From 2029 onwards	**117,170**	**26%**	49,807	12%
	464,443	**100%**	423,535	100%

26. Segment reporting

Due to the concentration of its activities in the development and management of shopping mall activities, the Company is organized into a single business unit. Company ventures are represented by six malls and, although information per venture is generated (such as billing and expenses), these ventures are not controlled or managed by management as independent segments. Company results are monitored and evaluated in a streamlined manner.

This perspective is supported by the following factors:

(i) The information presented to the key decision maker to allocate funds and assess Company performance is extracted from the accounting records of each company and evaluated individually for each company;

(ii) All ventures are located in the South of Brazil, more precisely in the state of Santa Catarina;

(iii) The malls are built mostly to serve the populations of classes A and B.

26. Segment reporting (Continued)

The shopping mall segment is included in the Company's consolidated financial statements and comprises the activities associated with the mall venturer. Due to their nature, revenues generated are subdivided into: lease, parking lot, provision of services and other. Performance of the segment is measured based on gross income presented in the consolidated financial statements, and strategic decisions are also taken based on consolidated indicators of mall activities.

27. Non-cash transactions

In the year ended December 31, 2025, the Company conducted certain transactions that impacted the asset and liability balances without impacting cash. There have been no relevant non-cash transactions in 2024. The transactions are summarized below:

	Individual	Consolidated
	12/31/2025	12/31/2025
Capitalized dividends	**458,506**	**458,506**
Related parties (PVA)	**4,339**	**-**

São Paulo, March 16, 2026.

REPRESENTATION
